# Preface

What, exactly, are the Secrets of our Solar System? If you read this book, you will learn.

There are thousands of books that purport to reveal the Secret of Life. There is only one book that reveals the Cosmic Secrets that give you the tools you need to get there. This is it.

Our Solar System is home to Planet Souls whose purpose in life is to teach you the lessons you need to learn Unconditional Love.

Only when you learn Unconditional Love will you return to the Divine Creator who gave you life.

This book tells you exactly what Planet Souls do and what they teach, in their own words.

The lessons, spiritual knowledge and wisdom in this book are all you need to know.

The unifying teaching of all great religions is Unconditional Love.

We are all children of God. The purpose of our Earthly journey is to learn Unconditional Love as a necessary step toward reunion with the That Which Created You.

This is your birthright. This is your destiny.

Once reading this, you will never look at the Earth, the Stars or yourself in the same way you once did. Your eyes and your heart will be opened as never before.

Your life has Purpose. Hope. Enchantment. Happiness. Optimism. And Love.

You are loved. More than you may ever know.

# Introduction

The Purpose of Life is to learn Unconditional Love.

Why? When you learn Unconditional Love, you can return to the Divine Creator who gave you life in the first place. You cannot return until you do.

The evolution of the soul begins with spiritual Self-Awareness, which evolves into Self-Realization, which evolves into Unconditional Love.

In our Solar System, the Sun, each planet and every moon is inhabited and overseen by a caretaker soul called a Planet Soul. These are truly great, highly advanced souls sent by our Creator to take care of this place in the Universe where souls come to learn how to love unconditionally. They live in complete Harmony and Attunement with God.

Each are the perfect expression of Unconditional Love and the Christ Consciousness doing their part to teach souls in this Solar System the lessons they need to learn Unconditional Love.

These lessons are all somewhat different. They are the lessons that souls seeking to return to That Which Created Them In The Beginning must learn to find happiness, bliss and contentment.

When the soul rejoins its Creator, Eternal Bliss is the reward. To reach that reward, each soul must learn Unconditional Love.

What follows is interviews with 33 Planet Souls in our Solar System and beyond.

This is not astrology. Astrology deals with personality influences and in the realm of opportunities for the soul. These planets, which in fact, do, to some extent, influence what a soul does and is, in reality, do more. Each has lessons to teach to you. These lessons, detailed in these interviews, give you wisdom and knowledge about how to advance yourselves and humanity toward the goal of Unconditional Love.

Scripture and our greatest saints and teachers have instructed us as to what we need, what we should learn and what we should do. Now you may learn what the great Planet Souls have to offer to us and expand your knowledge of your Solar System and the Universe beyond your sensual, astrological and astronomical knowledge.

These interviews will open your eyes, your hearts and your minds to a whole new vista of possibilities for soul advancement and the understanding of God's Incredible Universe.

As you read on, please keep in mind that you are looking at the Solar System and the Universe through entirely different glasses than astronomers or astrologers. This is the Spiritual Solar System. This is why you are here. To learn Unconditional Love from the best.

We begin with The Sun.

# The Solar System And Beyond

*The Sun*

NASA/JPL

# The Solar System And Beyond

## The Sun

**May I please speak with the Sun?**

“Good evening Greg. It is good to talk with you again.

“The Sun plays two primary roles in this Solar System.

“The first is to provide a center around which the planets can revolve and in this way, provide a place for souls to live and develop into fully mature souls capable of returning to their Heavenly Father, Divine Mother, Friend, Beloved God. That is the destiny of all souls. To return to That Which Created Them In The First Place.

“The second role that I provide is through heat and light, make it possible for souls to exist on Earth, to have this amazing and fantastic orb on which to grow and enjoy all that life has to offer.

“There is a third role which is the conveyance of the Thoughts of God through the element hydrogen, the simplest of all the elements.

“It is through hydrogen that all thoughts and emotions come from the Ether and God and into the physical reality you call Earth or the physical plane of existence.

“The role of the Sun is to provide a way for this wisdom, intelligence, structure, emotions and thoughts to be provided to all souls wishing to evolve in this system.

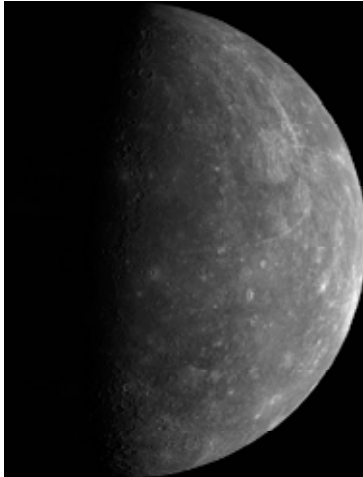

“That is what I do.”

**I have read other descriptions of the Sun which are much more elaborate. This seems quite simple.**

“Yes, that is because it is true.”

**Is that all?**

“Yes. That is all.”

*Mercury* NASA/JPL

**Well, thank you very much.**

“You are welcome.”

# Mercury

*Mercury is the planet closest to the Sun.*

**Guides, that was amazing. Let’s talk with Mars next.**

“No. Mercury, then Mars. It works better. A hint. Mercury, the Communicator, has to be next to the Sun, which is primarily hydrogen - the element that carries the Ether through to the physical planets

and all souls in the Solar System. Mercury plays two very important roles. We will let her deliver the message.”

## **Mercury please.**

“Good evening Greg. It is so good to speak with you after all this time.

“First let me say again that we Planet Souls in this Solar System are all extremely pleased to talk with you and get our individual stories to you and the world. The life of a Planet Soul is extremely busy and even though we do not have anyone or anything living on our surfaces, we are alive with souls in other dimensions and in some cases, inside of our bodies.

“Let’s talk a bit about the role of Mercury, the planet and then how that fits in with all the other planets.

“Mercury is closest to the Sun. The Sun is pure hydrogen, the mediator between pure ether, what everything in the Universe is originally created from, and physical form. This is the key to the role that Mercury plays in this Solar System. In fact, every Solar System where souls live in physical form has a ‘Mercury’ planet.

“Mercury relays or acts as an intermediary between the wishes of God and the actuation or the actual carrying out of those wishes in this Solar System.

“Remember, Solar Systems where souls come to learn the lessons of life are complete systems spiritually. Everything for a soul is there. Everything. There is nothing there that they do not need or cannot draw upon to give them spiritual sustenance, as well as physical sustenance.

“Mercury, then is the communicator of all orders and thoughts from God, the Creator of this Solar System and all the Universes in the Cosmos. In this role, Mercury must convey these thoughts accurately so it takes a great deal of concentration for this to happen. As you can imagine, one slip and it could end up sending a continent into another continent, or a moon colliding with another moon. That wouldn’t be good.

“On a spiritual level, the lessons that souls who come to live on Mercury learn to communicate also accurately as do I. This is not a place for the faint of heart. The rigors of this discipline are many and difficult. To be able to convey accurately even one sentence is an art that most people cannot achieve. So, many souls come to live on Mercury between lifetimes to brush up or bone up on this skill.

“Then there is the practice of meditation that is so important to life on Earth. In meditation,

as in prayer, the soul communicates, or attempts to communicate with our Lord God Protector and Provider. In this state, the individual must send and receive communications accurately so that they can actuate the guidance and love that they are given in and into their lives. Again the skill of communication is of paramount importance.

“Now let’s look at another aspect of communication. Thoughts and feelings are not just conveyed by the spoken word, but by writing and facial expressions, body and movement of all types and indeed psychically. All these various forms of communication exist and it is the nature of the soul to learn all of them. The better you are at it, the more clear is the communication of the idea or feeling.

“So here again, souls come to live on Mercury to learn these as well. Lacking the physical body to do this, they have to employ their imaginations to the fullest extent. This too is not easy for some, but for others, it comes quite naturally.

“And here lies still another benefit from Mercury, the creative force that drives the creative mind - imagination. If you cannot imagine it, you cannot achieve it, as the saying goes.

“Now, the question arises, do you have to live on Mercury in order to learn these skills? The answer is no. This is a place for speeding up the learning process.

“Mercury is capable of conveying these skills to each soul in this Solar System directly if asked or if accessed subconsciously. By meditating on Mercury, on me as the Planet Soul, Keeper of the Planet for God, I can convey these lessons to you directly.

“How is this possible? As with any developed yogi or yogin, one who has experience Bliss or Samadhi, having 360 degree spherical vision and awareness allows one to be everywhere at once. This is called omnipresence. It is the prerequisite of all Planet Souls to be omnipresent. That is, they must have mastered the skill of being fully aware of everything around them and within the realm of their responsibility. Thus, as the Planet Soul for Mercury, and the one given the task of teaching communication in all its forms and dimensions, I too must be omnipresent, which I am.

“I am not God, but I have been given this ability, as have all of you, to develop, which I did and my reward is to be given the supremely spiritual task of teaching souls how to communicate accurately and lovingly, with ideas and feelings that truly express your individual natures and the Nature of God.

“That is Mercury. That is what I do. It is only for the Glory of God and for all souls wishing to learn Unconditional Love in this particular part of the Universe, our Solar System.”

**Would you please give an example of a technique you teach to learn better and clearer communication?**

“Yes. Make up a sentence. Then repeat it to yourself. Now repeat it in exactly the same words and emotions to someone else. Then have them communicate the sentence of words AND emotions directly back to you accurately and exactly.

“It is very difficult to do. Now repeat it a 1,000 times. The same sentence, the same emotions with that other person. Then have them do it for you.

“You see, this requires a rigorous discipline that most people simply do not have. Also, in many, the ego steps in and says, ‘Why should I repeat it exactly? I want to add my own twist to it.’

“That is not the lesson of Mercury. The lesson is to convey the message absolutely accurately every time. Creativity is something one can learn and practice elsewhere. The only creativity we want here is to make up ever more complicated sentences and idea pictures. The better you get at

it, the better you can communicate to other souls.

“Then, when you have mastered the art of repetition, exact repetition, then and only then can one move on to more creative forms of communication with facial expressions, body expressions, different emotions, learning the subtleties of different words or phrases. The list is endless just as the possible combinations and permutations of any language are, for all intents and purposes, infinite.

“Now do you see how difficult it is to learn the lessons of Mercury? It is great fun when a soul masters all these abilities and a great celebration is had by everyone on the planet, and throughout the Universe when a soul achieves that unimaginable ability. Very few souls have mastered it. But those who have, have gone on to become great communicators in the many ways that it is possible to convey one’s ideas and feelings.”

**Well, thank you very much. There’s nothing that I can think of to ask you. This is great!**

“You are welcome and we hope your books meets your expectations. It has certainly met ours so far.

“This book, as you know, will bring great comfort to the world. And your observation is correct, it is part of the Comforter predicted in the Bible.”

**Wow. That's amazing. Thank you ever so much.**  
"You are welcome."

## Venus

*Venus is the second planet from the Sun.*

**May I please speak with the soul inhabiting the planet Venus?**

"Good afternoon Greg.

"Venus is hot and cold. Mostly hot both inside and outside. Venus has more to offer humanity than perhaps any other planet because Venus is the Love of God personified. Venus is the bright star in the evening, a time when people should be taking stock of their lives and their days. It is such a bright star because it is God saying to all souls that this Love is here for all to enjoy and bath in the light of His Love.

"The role of Venus is to provide a place for souls to go when they die, or are asleep, or meditative, or outside of their physical bodies to directly experience God's Love. This is something all souls can consciously do, whenever they want to do it.

"It is important for all souls to understand that God has created a Solar System where souls can develop. Each planet has a role to play in the Solar System and each moon has a role to play supporting that individual planet.

"The role of Venus is to directly express the Love of God to all souls living in and experiencing life in this Solar System

"More directly, Venus provides a counterbalance for Mars which is active, somewhat masculine in nature. It is active and aggressive. Venus is passive and nurturing. Both experiences round out a soul.

"But Venus is unique in the EXPRESSION of Love from God to all souls. That expression of Love precedes all activity of a soul for each was made from love.

"Venus is the emotional balance to Mar's intellectual side. The existence of both creates a home for souls wishing to return to God."

**Is there anything else?**

"Yes. When one expresses a love of God, that is when a soul expresses love for God, Venus does a little dance, so to speak. Unbeknownst to the lover, that love for God flows through Venus, in part. That love is attracted to the Love that is within Venus. So although it is certainly true that the love one expressed for God, goes directly to God, because of the Law of Magnetism and the Law of Similarities, part of it goes through Venus. This is extremely important to understand for as this love, given solely out of free will, is passed through Venus, it strengthens Venus and her role in the Universe.

"When love is given freely, all the Universe benefits."

**What about the love between two persons? How does Venus effect that? Or how can Venus**

*Venus*

NASA/JPL

**effect that?**

“Venus exists solely for the purpose of expressing the Love of God in this Solar System. Any expression of love between two individuals is also an expression of the Love of God, God’s Love. When two people are in harmony with that love, they are in harmony with Venus and the Role of Venus.

“The way to gain help from this Role of Venus is to focus one’s mind’s eye on Venus when you want to experience God’s love and the flow of God’s love. That is the best expression of what Venus can do for all souls.”

*Earthrise*

NASA/JPL

**Thanks. Nothing else?**

“Nope. That’s why I am here.”

## Earth

*The Earth, sometimes called “The Third Rock From The Sun”, is, in fact, the third planet from the center of our Solar System. This beautiful blue, green and white orb is hardly a “Rock”. But the title makes for one of the funniest sitcoms ever produced. For sure, the Earth has a great sense of humor about this show.*

**Before, when we talked, you said, “I provide the place in the Universe where all souls who wish to develop their skills at loving one another can grow and expand.” Can we begin with that and expand on it, please?<sup>(1)</sup>**

“Good afternoon Greg. Once again, it is a pleasure to speak with you like this.

“The Earth is a neglected soul today, as are all the planets and this work that you are doing will open the eyes, hearts and minds of millions of people all over the world.

“The Universe, the Galaxy, the Solar System and everything around you is so much more than meets the eye. The five physical senses only tell us what is in the physical world, not the nonphysical world.

“The souls who inhabit the planets and moons in this Solar System are great souls who have progressed beyond Unconditional Love to the point that they are truly one with the Creator. Everything they do, think, say and feel is in utter and complete harmony with the Divine Blessed One Who Created All That Is, Was And Ever Will Be.

“These souls are ones that everyone can trust. They cannot act in any other way than to enrich the lives of souls on the ascendancy and teach each one what they should know, and need to know to learn Unconditional Love.

“Planet and Moon souls are of necessity such highly developed beings because they must convey what the Heavenly Father - Divine Mother wants each soul to learn accurately and clearly.

“As the soul responsible for the Earth, it is my role and responsibility to provide a place for souls to come and grow, and learn the lessons necessary to become living examples of Unconditional Love.

“As such, the Earth is a very unique place in the Universe. There are perhaps a dozen ‘Earths’ in this Universe that are on a par, more or less with this planet. Some are more beautiful, some less beautiful.

“The Creator of All has provided this extraordinary planet for souls to live on in their physical state. The other planets in this Solar System do not provide that. No human can live on any of the planets. But they can exist and live in other dimensions. So, when a soul discards its physical body and goes to the Astral Plane, it can live a life on another planet or moon as if they were on Earth, without all the physical ailments and limitations.

“A soul is eternal, unless God decides to destroy it. God made all souls and only God can destroy a soul. The human body, on the other hand, is different. The human body can be destroyed

by another human.

“The ability to live on other planets while the soul is in its truer form, the soul state, is of great benefit to all. Learning the lessons of Jupiter, Mars, Neptune and the rest all help the soul proceed with its evolution to a mature and old soul, capable of expressing Unconditional Love for all things.

“The Earth is unique in other ways as well. On the Earthly physical plane, all matter is divided into two realms. We see life and death, good and bad, young and old, light and dark, wisdom and ignorance. Everything on the Earthly physical plane exists, one in contradistinction to the other.

“This Law of Opposites or Law of Relativity gives the soul the knowledge and wisdom to learn the lessons they need to learn to become fully developed, Self-realized souls.

“The trees that you see outside are but visions of the Creator of All Things. They are His thoughts, portrayed in physical form. So are all plants, minerals, elements, animals and people. All are the reflections of Thought. It is through the emotion of Love that the Creator brought this to fruition for souls to experience.

“Not everyone is allowed or wants to experience life as a human. But the Lord Thy God has at least given those who want to come here a beautiful place to live.

“The Earth itself has to function in perfect harmony with the Creator. Not to do so would cause the world to destroy itself. When souls in body form abuse the Earth and ignore the Universal Laws of Creation, then a bit of destruction occurs.

“The Earth itself will never be destroyed. But it can be degraded to the point where souls find it impossible to live here in a physical form. So it is important for all souls to learn these Universal Laws so that they will understand how to best be a part of the Earth.

“Mr. Burbank, in his discussion, does an excellent job of defining and conveying these Universal Laws.<sup>(2)</sup> Earth is here to teach souls that it is better and far more productive to live in harmony and balance with these Universal Laws than not to do so.

“There is one more important point to make. The Earth is the ONLY place for souls to live out lives in this Solar System in physical form. But it is not the only place in the Universe that they can do so. As such, some souls come and go from one system to another for different reasons.

“This statement does not refer to the movement of souls in the physical plane. This refers to souls who live, then die on another planet, then incarnate or reincarnate on Earth to learn lessons or to create mischief or problems for souls on Earth. There are many such souls on Earth right now who should not be here. They are difficult to spot and some create great harm to the world. Some have destroyed other worlds before they came here.

“I am here to tell you that they will not be allowed to destroy Earth although some will do great damage. Just be aware that humans are not the only beings incarnating as humans on the Earth.

“In the future, the Earth will no longer be a place for infant and baby souls to develop until the next 24,000 year cycle comes around. So, in the future, at least for the next 10,000 to 20,000 years, there will be far fewer bodies available than there are today.

“People should know that as many as 90% of the people living on Earth today will not have bodies into which to incarnate for the next 20 millennia. That should cause some pause in those who would destroy the Earth and all that lives here.

“Also, the Earth herself has changed in the past 20 years. The new Earth vibration does not allow for disharmony and evil. Only those souls who are in balance and in harmony with the Creator, who practice peace and understanding will be allowed to incarnate for the next 8,000

years.

“While there are Cosmic Wars even now trying to destroy the Earth as a place where souls can go to learn Unconditional Love, these too will be thwarted and denied the ability to perform their evil deeds.

“So, for those souls who are truly in harmony and balance with the Creator, the future looks bright. For those who are not, then they either have to wait, or go to another less attractive planet to live out their lives. Many indeed will have no place to go and they will require millions of years to pay off their debt from only one lifetime on Earth.

“So, you see that the Earth is a place of great opportunity, and a potential source of great problems for all souls who enter it. The Veil of Delusion that hides the true spiritual nature of the Earth and the Solar System is being stripped away by this tome. All who read this should understand that their Creator, their Father-Mother-God and Friend has given them a great opportunity to advance in one of the more pleasant places in the Universe. And they should take advantage of the chance rather than take advantage of others.

“That is the lesson of Earth.”

**Great. Thank you.**

“You are welcome.”

*The Moon and the Earth* NASA/JPL

# The Moon

*The Moon orbits around the Earth in such precision that it never repeats overflying the same area twice in a row and it always has its face oriented directly toward the Earth. Why is that? We shall see.*

**Well, its on to the Moon. Mr. Moon please.**

“Good evening, Greg. And how are you doing?”

**Very well thank you. And you?**

“Also very well. So, now we begin.

“The role of the Moon around Earth is to provide balance both in volume and in purpose. That is, the Moon is the counterbalance to the Earth so that it spins around

exactly as it should. It is also the balance to the strong feminine energy by my strong masculine energy.

“The Cosmos, as has been observed, is masculine in energy while the Earth is feminine in energy. Why is this?

“The Earth must be nurturing in its nature so that souls who come can develop in a way that is relatively safe. That is, the Earth provides food, shelter and warmth to all who live there. It provides for these things like a mother provides for its child.

“The Moon is different, being more like a father than a mother in the sense that the father is protective and provides for the long term care of the child.

“Of course these roles in human existence can have a lot of variations, but this is essentially the role of the Moon and the role of the Earth.

“Both work together, as do all the other planets and moons, to provide the ideal environment for souls to learn Unconditional Love.

“Now, the Moon is much more than that. The nature of fertilization is not as science thinks it is. It is not strictly a sperm fertilizing an egg or ovum. It is the nature of the Cosmos, the masculine nature of the Cosmos, that actually brings about new life, not the feminine nature.

“Let us explain. All life seemingly begins in the womb. The womb can be almost anywhere in any animal or plant. Rocks do not need wombs, only plants animals and humans.

“It is the nature of all life that the sperm that fertilizes the egg does not in fact fertilize the egg but represents the masculine energy in the Cosmos releasing life within the egg.

“What appears to be the joining of two incomplete cells into one is just part of the process. On the spiritual level, the egg is incomplete and the sperm is complete, bringing the masculine or reproductive energy to the egg.

“The mother of the egg, in many animals and in all humans, retains the egg while it is growing until it is developed enough to survive outside of the mother. Thus, humans naturally have come to believe that the mother is the beneficiary of the entire process of reproduction and development of the fetus.

“While this is also true on a physical level, the male sperm continues to contribute to the development of the fetus long after fertilization takes place.

“Why is this important to the Moon? It is because the Moon must provide this reproductive male energy to the Earth in order for it to survive. Without the male Moon energy, the Earth would be barren, regardless of what science says or believes.

“Without the Moon, life on Earth simply could not exist.

“The Moon is also the Earth’s connection to the Cosmos. The Earth does not relate to the Cosmos the way other planets relate to it. It must make the connection through the masculine Moon.

“Picture the Earth as being in a constant state of pregnancy. It is constantly generating and regenerating itself, plants and animals, and yes, humans too. It is constantly in a state of fertility and fructification. The Earth is, you might say, in a constant state of incubation.

“Thus, the Earth has to take care of itself like a pregnant mother must take care of herself. So it is difficult for the Earth to relate to the Cosmos, and she relies on the Moon to do it for her.

“Why is this important? It is important because the Moon acts as a conduit for the regeneration energies flowing into the Earth. Have you noticed that the Moon never repeats its orbit over the same piece of land and that it always faces Earth with the same face? This is because the energy that flows through the Moon must be constant and must come in contact with the entire planet.

“This brings up another role of the Moon and that is to reflect the Sun’s light on the Earth. The Sun shines on the Moon and the Moon in turn shines down on the Earth planet. This light is processed by the Moon so that it gives the Earth the balance it needs. In addition, light from all the other orbs in the Universe also reflect off of the Moon and down on to the Earth. Even when the Earth is not facing the right direction, the Moon can still reflect the light it needs.

“Every planet in this Solar System has a specific role to play. The light reflected down on the planet Earth and directly from these planets imbues the Earth and its population with the wisdom of each planet and moon. The Earth Moon, by processing this light, adds certain masculine or protective energy to these Life Forces and knowledge that is passed to the Earth this way.

“When the light on the Moon is at what is called ‘Full Moon’, plants, animals and humans are effected in various ways. The extra energy from this light not only makes seeds and animals more fertile at these times, the extra energy can sometimes make people do odd and unexpected things. This is the nature of the Full Moon. At the New Moon, when light is gone, we see the opposite happening.

“The Moon is here to provide the Earth with balance, fertility and sustenance. Without the Moon, the Earth would not be the vital and attractive place for souls to come to learn the lessons of Unconditional Love.”

*Mars Rising Over The Moon*

NASA/JPL

# Mars

*Fourth planet from the Sun, the last of the “Inner Planets”, the planet closest to the Earth and one of endless speculation as to whether or not life exists there, or did exist there. As with the rest of our orbiting heavenly bodies, Mars has a role far greater than the “Red Planet” of mythology and fame.*

## **Mars Planet Soul, please.**

“Good evening Greg. Nice to meet you in this way.

“Let us begin by talking about what Mars isn’t. Mars is not the warrior that people of ancient times portrayed me to be. Mars is not a killer of anything, including people or ideas.

“Mars IS action.

“Any idea must have two things to make it appear in the material physical world. The first is an idea. Then, the emotion to drive that idea must emanate from somewhere or something. Then and only then, action occurs.

“Action. That is what Mars is. The teaching of souls to be active, to take action but to be active and take action in such a way as to be in compliance with God’s Laws.

“The Creator dictates that everything that He is can be duplicated in His creations, the souls that inhabit Earth and the surrounds. These souls are the reflection of God, the Divine Creator and have all His/Her abilities but on a lesser level.

“So it is possible for any soul, in human form or not, to create their own ‘Earth’ or ‘Cosmos’ or even another person in their mind and in reality. It is the nature of reality. Each soul does this in order to experience fully what the Solar System School of Learning has to offer, which is to learn Unconditional Love.

“Where does Mars fit into this?

“Action taken without thought, commitment or responsibility can lead, and often does lead, to disastrous consequences. It is the role and purpose of Mars to teach souls how to make a proper commitment and take responsibility for their actions. Without this, a soul lives a life without fear or understanding that the things they do have consequences, both good and bad.

“Let’s take, for example, the current problem facing humanity with people who have chosen to blow themselves up and take the lives of others with them. They have the Free Will and Creativity to do this. But what of the consequences for that soul. Where was the clearheaded forethought? While this person is committed to his or her cause, where is the commitment to helping themselves and others learn Unconditional Love, the purpose, the SOLE PURPOSE, of life on Earth? You see, they have much to learn in order to advance as a soul.

“How does a soul learn responsible action? Well, they can learn by their mistakes, or they can tread the path to enlightenment and learn from the mistakes and wisdom of others. Most souls prefer to learn on their own, especially when the ego kicks in and drives the creativity of an individual.

“Now we must pause for a moment and talk a bit about the ego. It is not what psychology defines it as. It is the mechanism by which a soul brings something that is an idea into reality. Ideas plus emotion, love or hate, together with action create a physical thing, whatever the choice is. You can make a car or a great book. You can inspire others with great ideas that will create other things in physical reality. But always you must have the ego to drive it there. The ego says, ‘I created that.’

“This is as it should be. The ego is a mechanism, not a mental disorder. It is the mechanism, the program if you will, that brings the idea and emotions together. You might even view it as a pair of pliers. It is a tool. But when the soul thinks it is the ego, the pair of pliers, then their reality changes and they get caught in the trap of becoming that which they are not.

“Every soul on Earth has an ego because it is necessary for every task that they must perform.

“The role of Mars is to teach the soul the true nature of the ego and how to use it for their betterment and the betterment of all souls in and around this Solar System, the Earth planet specifically.

“The ego is also sometimes confused with action. ‘His ego drove him to do it.’ This is not what is happening. ‘His ego’ provided the mechanism for this person to ‘do it’. If he becomes attached to the ego such that he sees himself and the ego as one and the same, well, he has a problem and that is where Mars comes in.

“Life on Mars, in other dimensions, are also difficult for many souls. Some come here for the purpose of understanding the ego and learning how to activate it. Others come here to separate their egos from themselves, that is, learn the difference and gain control over their egos.

“Let’s say that someone has a ‘big ego’. Well, that’s not necessarily bad unless that person’s personal identity is synonymous with their ego. If they dream big ideas, and they achieve big results, that might be a good outcome. If they just think that the world revolves around them personally, which is also a trait of several countries in the world, then that holds a soul back from advancement.

“All souls have an inner drive to return to That Which Created Them. In order to achieve that reconnection and return, they have to meet certain standards set by God for all souls. That standard is Unconditional Love. They must view all Creation, their fellow souls, all of God’s Creation with Unconditional Love in all they do, think and feel. Without this, there can be no return of the soul to the Godhead, that Divine Source of All Creation. Upon return, the soul achieves eternal bliss, happiness, contentment, rest.

“Not all souls achieving Unconditional Love elect to return to God. Some elect to stay for a period of time in the physical, astral or causal plane and help other souls ‘climb the ladder’.

“But ultimately, all souls want to return and most do.

“Mars teaches a soul how to achieve Unconditional Love through action. Looking at it somewhat differently, we see a form of Yoga called Karma Yoga or the Yoga of Action. Yoga means ‘union’, union of God and the Self-Realized Soul. Self-Realized means that the soul recognizes and understands the true nature of its being. Karma Yoga teaches a path for the soul to follow that

*Mars* NASA/JPL

emphasizes action to achieve this union. Through good works, one can achieve an understanding of Unconditional Love.

“This is what Mars is. This is what Mars does. Action. Teaching souls the true nature of action and how to use it to achieve bliss.

“Like Mercury and the rest of the planets, a soul can learn this through a passage through Mars, or by meditating on Mars to learn the same lessons. Either way works effectively, but direct passage works quicker.

“Each planet is here to teach souls different aspects of life and different lessons that help them on their Journey back to God.

“This is the role of Mars.”

**Thank you very much. Not what I expected at all. Will you please give an example of teaching “action”.**

“Yes. Say you are in a car and you see someone on the highway who is hurt. What do you do? Call the cops or call for an ambulance? Do you get out and help them if you can? Or do you just drive on and ignore the scene?

“What if I told you that in your personal reality, the hurt person didn’t exist at all but was an imaginary creation you made up?

“Those are the types of experiences that are created for souls who live lifetimes on Mars. Yes, they are ethical tests. But more so, they are created for you to decide what action really is and what it is not. Once learning this, a soul is more prepared to return to another lifetime on Earth.

“That is how it is played out.”

**Thank you.**

“You are welcome.”

*Deimos*

NASA/JPL

## Deimos

*Deimos is one of three moons who orbit Mars. The other moons are named Phobos and Gaspra. As you will see, like the Moon of Earth, each has a supportive role to play with their primary planet, Mars.*

“Good afternoon Greg. How are you today?”

**I’m well, thank you. And you?**

“Very well indeed. Very well.”

**So, the question is, what role do you play in this Solar System, with Mars and with humanity and other souls seeking soul development in this Solar System?**

All good questions. Do you not also want to know why we’re not round?

**Well, yes. That too occurred to me.**

“Good. Let’s start there. But first, be aware of the fact that we are Planet Souls just like all the others. Our size and shape does not define us or our purpose, as such.

“The shape of all the other moons is round. That you know. Phobos and I are not round but more oval in shape. That is because when the planets were formed, we solidified before the others and we were not subject to the same asteroid bombardment that the others were.

“The shape of Deimos and Phobos more rightly relates to the purpose of Mars. It has been explained to you that Mars is centered in action and in teaching souls to become active, use their minds, their thoughts and their feelings to bring into existence that which they need to further their development.

“Part of that task lies with the three Mars moons.

“I am responsible for bringing the reasoned part of action, Phobos is responsible for bringing the feeling or emotional part of action. That is why there are only two moons at Mars.

“Both concepts are incomplete on their own. That is why the shape of both Deimos and Phobos is also incomplete, when compared, of course, to the rest of the planets and moons in this Solar System. By themselves, they are complete.

“An emotion without a thought, or a thought without emotion cannot be manifested into the physical world of reality. Both are required.

“‘God so loved the world’ is an oft quoted line from the Bible. God loved the world he had created and wanted to do more. The thought that He could create a world was followed by the love TO create a world. When He saw that was good, He wanted to create more and more and more. Love drove the idea of the thought into physical reality. This required action.

“All thoughts sit by themselves until they are driven into reality by an emotion, in this case love.

“It is my duty to work with the development of reason in all souls. Reason is more than just reasoning, it is the idea that one has the ability to create new things, new ideas and new possibilities. Reasoning is the process of determining whether or not something is feasible or possibly real.

Reason is different. Reason is the process of determining if something can be done and for what reason or purpose. Once the idea is created, the reasoning part begins to determine it's place in the Cosmos.

“Inductive or deductive logic is a form of reasoning. Inductive logic works best with intuitive reasoning. Deductive logic works best with mathematical reasoning.  $1 + 1 = 2$  is deductive logic or reasoning.  $1 + 1$  ‘may’  $= 2$  is inductive logic. Yet, if done properly, both are the same and reach the same conclusion.

“My role in the Solar System is to work with Mars, the activator planet, to teach reason, reasoning and decision making based on reason. Phobos is different. Together, we combine to teach souls how to take action in their lives.

“This, as with everything else, leads a soul to Unconditional Love, through reason.”

**This is very interesting. Thank you. On to Phobos, please.**

“You are welcome.”

## Phobos

“Good afternoon Greg. Now on to the realm of discovery again.

“As Deimos mentioned, he is responsible for the mental, reasoning or thoughtful part of action and I am responsible for teaching the emotional or feeling part of action.

“All action must incorporate both activities, both motivators or both inspirators, if we can coin a new word.

“Each soul, as an image of God, is given the ability to create things in the physical world. They also have that ability in the astral and causal worlds. The ability to create gives the soul the experience it needs to learn the lesson of Unconditional Love, which is the only way out.

“The emotions drive an idea into physical reality. In fact, if you look into it further, emotions drive concepts into creation on the emotional realm, also known as the astral plane.

“But what creates emotions? That is always such an interesting question. Is it a thought that creates an emotion? Do all the emotions exist in a sort of a ‘grab bag’ of feelings? Where do emotions come from?

“As Shakespeare says, ‘Ah. There’s the rub.’

“Emotions come from within the heart. The heart is the center of all emotion just as the mind is the center of all thought. As with all Creation, these emotions existed at the instant the soul was created. All souls are created in the image of God, who also has emotions. So, every soul has that ‘grab bag’ of emotions with it at the moment it was created.

“The true question, then, is how does this soul develop its emotions and how does it learn how to use them for its own betterment and the betterment of others.

“Love is the emotion that created all physical reality. Not hate. Hate is finite. Love is infinite. It is through love, the infinite emotion that a soul graduates on to the higher planes. It is through hate that the soul descends into the lower planes, and retards its progress.

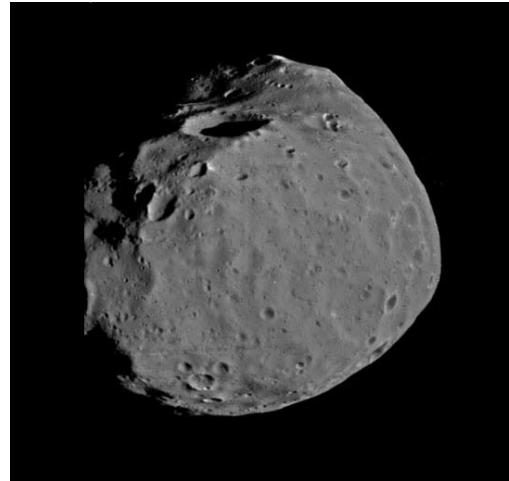

“Hate is a truly destructive emotion while love is a truly constructive emotion. It is through Phobos, and thus through Mars action, that the soul learns to discern the difference between the two and then learns how to use love to create entirely new things that were never before seen.

“It is also true that everything that ever was, is now and ever will be was created at the instant this Universe was created.

“This Universe was created, as were all the others, for the single purpose to give souls a place to develop so that they could return to their Creator, God. Without a place to work out these actions, a soul would spend eternity wondering around, looking for something to do, creating mischief wherever it goes, generally driving everyone crazy.

“The Lord does not want this to happen, so It gives all souls a job to do and that job is to learn Unconditional Love.

“There are many realms and dimensions of existence. Each has different opportunities for souls to develop in areas of greater or lesser freedom. The physical reality known as the Earthly Plane of Existence affords the soul complete freedom to develop any way it chooses.

*Phobos*

NASA/JPL

“This is so, so that the soul can develop more quickly than the other realms and dimensions offer. Some souls prefer the physical existence to speed up their progress. Not every soul makes it through and some are destroyed as incorrigibly and hopelessly corrupted.

“But it is the freedom that each soul has to be itself and find its spiritual Self that makes the physical plane unique.

“The emotions that one develops, and the way they are used, are the keys to successfully transitioning lifetimes in the Earthly existence. Without good control of ones emotions, and the development of love, not hate, a soul has no chance of learning Unconditional Love.

“So, we, Deimos and I, would say that a soul, a person, should look to develop both the reasoned and thought side of itself in equal development with their feeling and emotional selves. When you have the perfect balance between the two, the world is at your feet. All things are possible.

“Without this balance, which also expresses itself outwardly as a perfect balance between masculine and feminine appearance, and expresses itself as the perfect balance in action - both emotion and thought in perfect balance, the soul will never learn the lesson of Unconditional Love and be able to practice it in all it does.

“Two moons of Mars, Deimos and Phobos, working with and through Mars, teach all souls this perfect balance. If only they meditate on us, they would learn the lessons needed to speed up their development.

“We are always here to help anyone who asks and to entertain them with an unlimited number of possibilities. We do this through both discipline and humor. In fact, you might say that despite the past warnings of the ancient god Mars, we are the most hysterically funny moons in the Solar System.

“So, come one, come all. Learn what it is to be Unconditionally In Love.”

**Wow. That’s so cool!**

“We saved the best for last.”

**Thank you.**

“You are welcome.”

*Gaspra*

NASA/JPL

## Gaspra

“Good morning Greg. Do you feel the speed?”

**I do.**

“Well, to every action must be attached some form of energy to motivate and circulate an idea and emotion. That is where I come in. Each soul has to be motivated to do something. Simply thinking and wishing will not create much of anything except more dreams and wishes for rewards.

“When a soul wants to learn action and is not motivated to actually DO something, he or she gets frustrated eventually. So, it is the teaching of Gaspra that each thought, word and deed must receive motivation and get the proper kind of motivation.

“That leads us to the crux of the lesson of Gaspra. Why should we be motivated and for what purpose?

“These are two vital questions that each soul must ask. So, this leads us, obviously, to ethics and morals.

“It is the task of Gaspra to teach right thinking, right action, right feeling and right acceptance of the Creator Of All Things to each soul.

“This is much more than a belief in God. It is a teaching that God is everywhere. God is in all things and all things are in God. Without God, there is no life, there is no Solar System and there is no Unconditional Love.

“To learn why one should be motivated into right action, it is all based on the ethics and morals as taught by God.

“Love one another as you would yourself. Love God above all other things. If you do not, you will never reach the state of permanent bliss, of everlasting happiness.

“The only sin is ignorance of God. This leads to all sorts of problems for all souls. God created this Universe as a place for His sons and daughters to learn the lessons necessary for the return to That Which Created Them In The Beginning.

“Unless a soul has discarded all the dross around itself, and sees itself as a perfect reflection of the Perfection that is God, it cannot return to everlasting happiness and contentment,

“I teach each soul that God exists, that God loves his children as a Father or Mother would love theirs, or should love theirs.

“In doing so, I teach that after the little family into which you were born, is the Universal Family into which God created you.

“There are more souls in this one Universe than you can count. Each must learn how to love themselves, love one another, love all of God’s Creation and to love God.

“To deny the existence of the Divine Creator is to deny one’s own Divinity. Without that, one simply cannot ascertain that which is within themselves, the True Self.

“The Self within you is a reflection of God on a small scale, wishing for your return to the Divine to escape the physical torments and return for Everlasting Bliss.

“God calls to each of his creations to ‘Come home’. It is that Divinity within each of us that whispers in your ear, ‘Come Home Now!’.

“It is my task to reach into the minds and hearts of all souls and remind them the each is a son or daughter of God. Each must act with the moral and ethical equivalent of God in all that they do.

“Honesty, integrity, sensitivity and the rest are all reflections of God if done purposefully and with perfect harmony with the Laws under which you were each created.

“If you want to know how to act ethically and morally, simply meditate on me and I will teach them to you.

“Any action you take, as taught by Mars, must be done through God and in Harmony with God for the soul to advance and learn Unconditional Love.

“That is what I do.”

**Wow! Who would have known? Thank you very much.**

“You are welcome.”

# Asteroid Belt

*The Asteroid Belt is a massive orbiting group of rocks. Some have called it the remnant of a planet that exploded during the planetary wars of epochs past, although science not proven this. What we do know is that there are about 200 major rocks in this belt and an uncountable number of smaller and small rocks and ice in this area located between Mars and Jupiter.*

*Asteroid Ida and its Moon*

NASA/JPL

## **Guides? What about the asteroid belt?**

“That was an old planet which was destroyed in the cosmic wars. The fragments are inhabited by soul fragments of the human race. Those who are there are the ones who created much of the destruction in Atlantis and other lost civilizations. This is their incarceration period. Don’t make to big a deal about the Asteroid Belt. It is a prison for these souls. Endlessly circling the sun, nothing to do except look within. Far worse a fate than living on Jupiter. The Asteroid Belt is for the worst of the worst. Those evil souls who do not see God in anything are given this chance to find their way in life. That is why God allowed the planet to be destroyed. Each asteroid is a separate prison for each soul, the entire soul. Not fragmented souls. It is a terribly lonely place and only for the worst of the worst.

“You may use this description for your book. But do not try to get in contact with them. There is no Overlighting Soul for the Asteroid Belt. The sign says “Stay Away” and it means it.

## **Wow!**

“Yes. We know that this is quite startling for you. Every Solar System has this kind of arrangement for the worst of the worst. Sometimes it is asteroids, sometimes other mechanisms. That which is created in a Solar System is not allowed to leave that Solar System until it is perfected. That does not include travelers like Dr. Steiner, Einstein and others. They are exceptions because they have reached a level of development which is so high, that they are unaffected by the Karma of these miscreant souls. Like Paramahansa Yogananda and the rest of the Gurus.<sup>(3)</sup>

“The terrorists on Earth are on your mind, we see. Let it be known that they are given Free Will as a gift and to abuse or ignore this gift creates a grievance that in many cases, cannot be paid back by an infinite number of incarnations on Earth. They must return to much harsher environments to pursue soul perfection, and will.

“As for the Antichrist and his disciples, they too will never be allowed to return to Earth in this cycle, but even worse for them, in any other cycle. This is their last chance to redeem themselves. Then they will be sent to the Asteroid Belt if they cannot contain themselves.

This includes bin Laden as well as their acolytes. Millions in all. Isn’t it a good thing that so many asteroids are available for them?

“The reign of Satan and the mischief he has caused will cease after this century. This Solar

System will have completed its mission of being a place for infant and baby souls to develop. This group also includes truly bad young souls who have learned nothing. In fact, you might call the Asteroid Belt “Learned Nothing University” except the only teaching that is done there is for the soul to look inward to learn its true nature. This is not a pleasant experience. Four billion years alone - or longer. And some people think Gitmo is bad.”

*Jupiter And Its Moons*

NASA/JPL

# Jupiter

*Jupiter is the largest planet in our Solar System and is the fifth planet from the Sun. It's size and composition reflect the size and importance of its mission in this System. Let us see.*

“Good morning Greg.

“You can see that as big as I am, I am not overwhelming in the substance of the soul. It is true that men such as Adolph Hitler come here to learn some difficult lessons in discipline and sensitivity to

others. The Jupiter experience is very difficult, perhaps the most difficult of all planets in this Solar System.

“But my nature is very loving. ‘Tough Love’ I believe many call it. My nature is to provide a place in this Solar System for all souls to develop perspective in their relationships with others. That is what I mean by sensitivity and discipline. Those who do not learn it must come to me to learn it. That does not mean a lifetime spent here. My presence in the Solar System is what presents the influence to all souls.

“Jupiter is large. The largest of all the planets. Smaller than the Sun of course but the largest of planets. That is not by happenstance. Sensitivity and discipline, personal discipline, not the disciplining of others, is the hallmark of a great saint, It is my job to carry that influence directly to the Earth bound souls and others in this Solar System. The size of this particular planet body expresses the importance of learning these traits of the great souls. Once one learns sensitivity (feeling) and discipline (thought or intellectual control of one's thoughts), one learns balance in life and a respect for others that is unbound by the severe limitations of the physical presence. This gives the soul the perspective it needs to develop Unconditional Love for all things, the so called ‘living’ or the so called ‘dead’. That is my nature. The lessons are very important to learn and until one learns them, one cannot progress along the path to restoration with the Divine.”

## **How do you do this? How do you teach this?**

“It is important to understand that the influence that I can bring directly to plants, animals and people has a direct influence on their being. For example, if you see the color yellow or white in a flower, you are seeing me. The flower reflects my presence which has a direct influence, subtly, on you, your feelings and your reason. It is learning by association and by example.”

## **So just your presence, like an elephant in a room, is enough to influence them?**

“An apt analogy although I doubt that I would have used exactly that metaphor. Yes. The very presence of Jupiter has a direct influence. Since these are the two most important lessons for a soul to learn, Jupiter is sized accordingly.”

**Are they more important than Love?**

“No they are not. They are stepping stones to learning Unconditional Love. To see Spirit in all things, mineral, plant, animal or human - the sky, the planets, the Solar System, indeed the Universe - is the very lesson that all souls need to learn to understand Unconditional Love. Without this perspective, it is not possible. Therefore my presence in this Solar System gives all souls yearning to learn the Lessons of Return and a place to develop themselves.”

**Do you do anything more?**

“Yes. I provide a place for some souls to learn this specific lesson but on another plane or, you might say, another dimension. Thus when the seemingly incorrigible have not learned their lessons, they must come here and learn how heavy a feeling of responsibility it is to hurt someone or something without taking into consideration its true Spiritual nature. It is difficult to describe the experience for souls housing themselves in physical bodies. But the soul who lives a ‘lifetime’ on Jupiter finds the experience so oppressing, so restricting and so difficult because it cannot leave until it has learned its lessons. It is a prison of sorts for the soul to take advantage of for a limited or finite period of time. This can last centuries or millennia. Some are still here after the initial planetary wars and have still not learned the lesson.

“This is a very difficult task for me and only a Planet Soul of the highest order and development can hope to become a Jupiter soul. These miscreant souls must be brought along with at once tender loving care and must suffer a very harsh environment as well. It is a very difficult task for the Planet Soul.

“But, I must be quick to point out that all Planet Souls are very advanced indeed or we could not be a Planet Soul. Do you see?”

**I think so. Is that, then, all?**

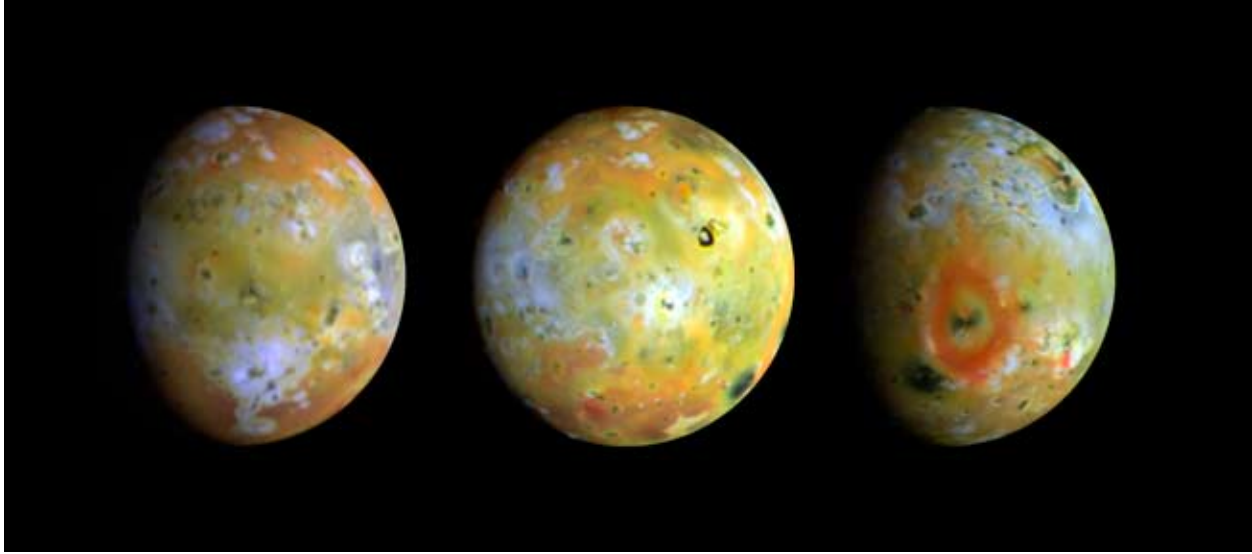

“Yes. Loving instruction is what I provide.”

**Why the colors yellow or white?**

“They resonate to sensitivity and discipline.”

**Thank you very much.**

“You are welcome.”

*Three Views of the Jupiter Moon Io*

NASA/JPL

## Io

*Jupiter has four large moons, Io, Europa, Callisto and Ganymede. Io is the innermost of the moons of Jupiter.*

“Hello Greg. What would you like to know about this old moon?”

### **Good question. What is the purpose of your existence as a moon of Jupiter?**

“Well. It all started a long time ago before the planet wars that created the Asteroid Belt. As with all moons, we balance or enhance the role of the planet to which we are attached or with which we are connected. I say attached because you will find that moons are attached by lines of energy to the various planets with which they are associated.

“My role is to enhance the role of the planet Jupiter. You may recall that Jupiter serves as a place for all lost souls to go to regain their ‘humanity’ or their balance in their soul life. Jupiter life is particularly hard and must be experienced only by those who transgress the Laws of the Universe in the vilest way. To go to this planet, one must first go through a period of introspection and that is where I serve the Creator. I provide that stop-off place where souls are, in a sense, frozen and forced to see themselves and their deeds for what they are. It is, in a sense, a ‘looking glass’ as in Alice in Wonderland. All souls doomed to go through life on Jupiter must ‘go through the looking glass’ of Io before they are allowed to enter the Jupiterian existence.

“When they have finished this experience and they believe that they are ready to reenter the Universe of other souls that they have hurt or offended, they again must enter into Io and begin a period of introspection and clarity. When they have finished and all are satisfied that they are ready, they may leave Io and enter the Universe they left once again.

“The volcanic action and freezing temperatures on Io are symbolic and symptomatic of what happens on this moon. The volcanoes are the release of the anger and resentment that all souls must go through and the freezing is the ‘mirror’ aspect, their thoughts and anger ‘frozen’ in time so they can see themselves for what they are.

“This process of in and out (I-O) goes on constantly as there are many souls who must

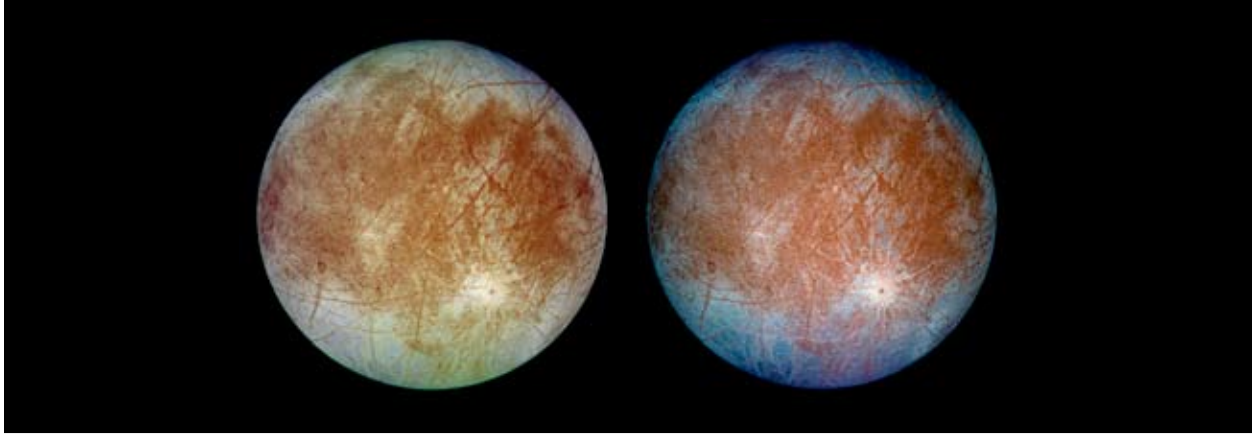

enter this Jupiterian existence to rehabilitate themselves and be rehabilitated. That is the reason for the existence of Io and the role of Io. Again, as with all Planet Souls, there are many eons of preparation that a soul must go through to do this job for God.”

**Would you say that you are the gatekeeper of Jupiter?**

“That would not be entirely accurate but you can view Io as such. More accurately, it is the portal for entrance and exit into the most difficult of all existences. Not Hell but a planet of strong forces that mould a soul into the proper form to be a part of God’s Creation.”

**Thank you.**

“You are welcome.”

*Two Views of the Jupiter Moon Europa*

NASA/JPL

## Europa

### Europa please?

“Good afternoon Greg. What you see when you observe Europa is a planet in a constant state of flux, of change. This is important to know as it is the job or role of Europa to take souls from the planet Jupiter and cleanse them of the more unfortunate attributes of their soul selves. Many souls who are exiled to Jupiter for retraining, shall we say, are incorrigible but God has not given up on them completely. They must then go to Europa to be ‘scoured’ clean, thus the acidic part of the moon that your astronomers and astrophysicists see.

“It is important, again, to understand that the Universe is constructed in an orderly manner and the physical characteristics that one sees through a telescope or with the eyes of a satellite are only physical manifestations of a higher reality.

“The role of a moon such as I, Europa, is quite simple. Clean the soul so that it may reenter the Universe. That is what I do.”

## Ganymede

*Ganymede is greater in size than Mercury and Pluto. It is the largest moon in the Solar System. You will soon see why.*

**May I speak to Ganymede please? Brr. Cold.**

“Yes. The moon Ganymede is very old and very cold. It is the first of the moons to be attracted to Jupiter when it was first created and the first of the moons to serve as a graveyard for the souls who no longer can live in the Universe. All are locked up here in death. Only the Creator can create a soul and only the Creator can pass death upon a completely worthless and permanently incorrigible soul. That is the purpose, if you will, of Ganymede. It is to provide a place for the discards of the Universe.

“As such, it is a graveyard of the worst of the souls of this Universe. It is not a place to visit as it is extremely difficult even for enlightened souls to enter.

“Ganymede is very large because there have been a very great number of souls who are interred here. These souls, and there are a few from the current history of Earth, are the meanest of the mean, the worthless of the worthless, the most vile of the vile. These are the souls who cannot be rehabilitated or who refuse to be rehabilitated. Some souls are like that and the Creator has determined that they must be put to death. It is only the Creator who can create souls and only the Creator who can destroy them.”

*Ganymede and Jupiter*

NASA/JPL

*Ganymede Close Up*

NASA/JPL

**Thank you.**

“You are welcome.”

## Callisto

**May I speak with Callisto please? What do you do? What is your role in our Solar System and with planet Jupiter?**

“Good morning Greg. As you have learned, the other major moons around Jupiter work to help souls enter and leave the planet experience, and in some cases stay there forever.

“My role is, you might say, administrative in nature. It is my job to keep track of all the souls who enter and leave the Jupiter experience.

“This is too big a job for Jupiter, even though this soul is in many ways as large as the planet itself.

“So many souls need the Jupiter experience that it is important to keep track of them after they leave as well and that is a second task given to me.

“All souls who come to Jupiter come here to learn sensitivity to others and personal discipline. In that role, they are graded in their progress and that is my third task to perform. These souls are watched carefully since most, if not all sometimes, do not want to come here but are sent here in a kind of detention center until they learn to get along with other souls the way they should.

“Thus, it is important to keep track of them and their progress for no one soul is allowed to leave Jupiter until it has completed its task of learning sensitivity and discipline.

“These are the tasks assigned to me. It is a difficult job but can be very rewarding as the souls who make real progress are celebrated when they are allowed to leave.

“We also keep track of the souls who must never leave and these are difficult ones, at best. These souls are ever relegated to either continued education, or death of the soul by the Creator of All Souls.

“This justice is dispensed with a simple thought and great sadness as the Creator relieves himself of those who cannot be rehabilitated or become as they should in the Eyes of God

“It is my job to send these soul bodies to the other moons to be “buried” in marked, and unmarked graves.

“So, without my help, there would be no way to track these souls and the Cosmos would be less a enjoyable place.

“That is what I do.”

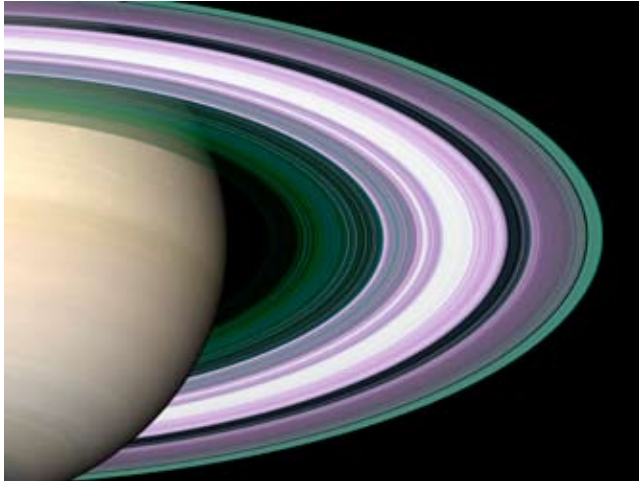

**Very interesting and very surprising. Thank you.**

“You are welcome.”

*Callisto*

NASA/JPL

*Saturn And Its Famous Rings* NASA/JPL

# Saturn

*Saturn - Leadership (the Crown)*

**OK. Let's do it. May I speak to Saturn, please.**

“Good evening Greg. It's nice to get to know you.

“I note that you have picked leadership as the distinguishing characteristic of Saturn. Let's be more specific.

“Saturn is a great planet in size because its task is truly great. Great in the sense that it is a great deal of work

“Every soul must learn to be a leader or they will never be able to lead others to God. My task, my role is to teach leadership. But it is far more than that. Leadership is only the beginning.

“A leader must have certain principles that are good and positive for people to follow them. So, I teach the principles of leadership. These are honesty, openness, integrity and love.

“Honesty is essential to being a good leader. There are times when a leader cannot speak of certain things. But that is not dishonesty. It is being prudent. Honesty with one's family, friends, coworkers and yourself is the key to happiness and integrity.

“Integrity emanates from honesty. When one is honest with one's self and others, and does so consistently, one earns the nomenclature ‘integrity’. Consistency of honesty equals integrity.

“Openness is important because if one is not open about one's ideas and thoughts and emotions, there is distrust. Openness, like all characteristics of a person has two sides too. Too much openness can lead to disaster while too little can cause distrust.

“Love is the emotion of creation. Without love, the soul has nothing. How can it learn Unconditional Love without love in its life?

“It is not possible to express love if one is filled with hate, or fear or obsession, greed or unchained desires.

“A leader must demonstrate all these characteristics, in balance and with restraint if they are to be a true leader.

“For a soul to reach the level of Unconditional Love, they must lead themselves first back to God, then they can lead others back to God.

“As with the other planets, a soul can come to Saturn to learn the lessons of leadership, or a soul can meditate on leadership and Saturn will answer the call to teach what that individual soul needs to learn.

“That is the role of Saturn.”

## Titan

**So, let us move on to Titan please.**

“Good morning Greg. How are you today?”

**Fine. And you?**

“Very well thank you.

“On Saturn we have one large moon and four smaller moons. Around the planet, we have a ring of particles that express it’s unique personality and purpose.

“The particles that compose the ring around Saturn, spiritually speaking, represent the halo that is seen from time to time on saints and other exulted beings. That is the stature and importance of Saturn.

“Do not let his short message convince you that what he does is unimportant. On the contrary, it is vital to the advancement of all souls. Leadership with honesty and integrity is the essence of soul advancement.

“We have one large and four smaller moons because Titan teaches the most important aspect of leadership, which is honesty.

“It is said that when the English first came to India, a devout Hindu would admit to guilt of a crime that an Englishman would never have done. This amazed and astounded the English. Why was this so?

“India is the spiritual center of the Earth. Those devout Hindus knew that if they did not admit their guilt, they would suffer more punishment than if they hid it Admission of guilt is self-honesty. It is important to be honest with yourself first or you will live a life in delusion and unhappiness.

“One can only live so many lifetimes in delusion before it catches up with you.

“So, of all the traits that a soul must learn, is self-honesty, honesty with others and honesty with God. That is what I teach.”

**How do you do that?**

“As with the other planets and moons, through prayer and meditation. But if a soul wants to come to this moon to live a time here, I teach through example. The student must observe all that happens in the ‘day-to-day’ operations of this moon. This soul student will have access to all the thoughts and deeds that others do, and their delusions and observations.

“By observation, then by applying the lessons to one’s self, these student souls learn what they should do and what they should not do.

“Once learned, they are sent back to put what they learned into practice on the physical plane.

“Many souls return not to the physical plane but to the astral plane where they can be of service to their friends and relatives, and others, by conveying the Truth to them in their dreams and in their daily lives.

“Honesty and objectivity go hand in hand. Without honesty, there can be no objectivity. All souls must learn to be honest with themselves first. Without objectively viewing their faults and strengths, they cannot properly and quickly advance in the spiritual world, nor in the physical world.

“When you think of honesty, think of Titan. That is my role in this wondrous Solar System and Universe.”

*Montage of Saturn and its Moons* NASA/JPL  
*Titan In The Foreground*

## Dione

### **OK. Is Dione available to talk.**

Hi Greg. So nice to meet you. What would you like to know?

### **What do you do, how do you do it and how does it relate to Saturn?**

“All good questions. As with Titan and the other moons, I support the important work of Saturn to help souls discover the truths within themselves. While Titan focuses on honesty, I focus on openness. While it is sometimes necessary to ‘hold one’s cards close to the chest’, it is important for leaders to be open with themselves and with others.

“Openness has many different meanings. One can be open and honest, but not necessarily telling everyone who will listen what is going on in their lives. At the other end of the spectrum are world leaders and captains of industry and religion who must be careful what they say and reveal for many reasons, primarily two - people will misinterpret what they mean and their enemies will use the knowledge against them.

“So openness, while an important ingredient in leadership, is something that must be tempered by the anticipated, and unanticipated consequences of this knowledge to the people hearing it.

“Openness is also about being open to new ideas and being able to discard the beliefs and hindrances of the past that hold one back in its soul development. Many people are unable or unwilling to look at anything new. Being open to new ideas does not mean that a person must accept them. Being closed to new ideas does not motivate the soul to progress.

“So it is important to be open to ideas and have the discrimination to determine whether or not they are beneficial or destructive. So here is another aspect that a leader must learn, discriminative thinking. I do not teach that, Tethys teaches that.

“I teach people not to be afraid of something new, while at the same time, holding on to all the good ideas, thoughts, feelings and principles that they have learned in the past.

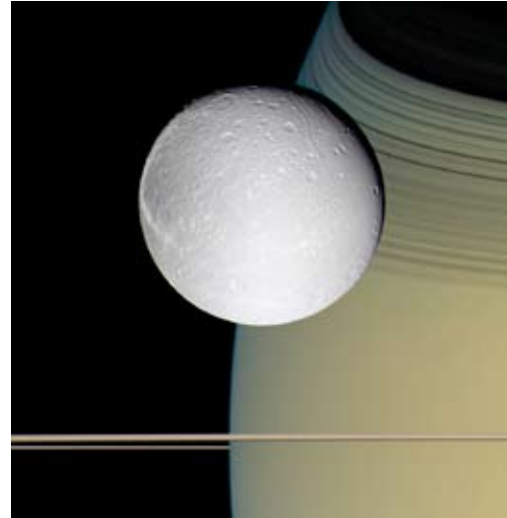

“The third aspect of openness is the ability to see openly into the future. This is not the ability to be precognitive, as is taught by the Constellations, but the ability to see the goal and be open to the possibilities that this goal offers. If a soul has no goal in life, if a soul does not see its ultimate goal as learning Unconditional Love, then it is rudderless and sail-less, adrift in the ocean of desires and material pleasures.

“All souls must eventually come to understand that the Earth and the Cosmos are spiritual worlds as much as they are physical worlds. Each soul must eventually come to understand that its destiny, inserted at birth by God, is to return to God. Only those who have learned the lessons of Unconditional Love can return. But the desire to achieve this return to Bliss is buried deep within all souls.

“The soul must be open to this for it to succeed and that is what I teach.”

### **Thank you very much.**

You are welcome.

*Ringside With Dione  
Floating In Space*

NASA/JPL

*Tethys in Full color* NASA/JPL

## Tethys

**Dione says that you teach discriminative thinking.**

“Yes Greg, that is true.

“The mind that cannot discern between right and wrong, truth and lies, spiritual and evil will never advance beyond their basic animal nature.

“Animals, it is said, lack one essential characteristic that humans have, and that is self-awareness. That is the ability to look in a mirror and recognize itself as a separate being, distinct from all others.

“This is sometimes called the ‘I Am’. The recognition that ‘I am a person’ or ‘I am different from everyone else

on the planet’.

“But how are you different when it is taught that all souls are equal, that all souls are children of God, equal in His eyes?

“You are different because each of you have had different experiences and acquired different traits and skills from others. No one soul has had exactly the same experiences in life, or in their lifetimes, that you have had. Nobody.

“So, how is discriminative thinking part of this?

“The ability to discriminate does, as was observed elsewhere, not refer to discrimination of the races or any other imaginary difference. It means that one who is to become a leader has to learn the skills necessary to determine what needs to be done and what does not, who is the best person for the job and who is not, and what principles and laws are at work and at stake whenever a task needs to be performed.

“A leader needs the skill to evaluate all these factors when creating a business, an organization, leading a country or simply keeping a home organized and clean. Leadership takes on all levels from the simplest task to the most complicated.

“So the ability to discriminate between what is helpful and what is not is key to leadership. That is what I teach.”

**Thank you very much.**

“You are welcome.”

**So that leaves us with integrity and love.**

*Rhea*

NASA/JPL

## Rhea

### Which do you teach?

“Good afternoon Greg. It is a distinct pleasure to meet you and be part of this book. People in the world will benefit from this knowledge that you have gained.

“I teach love and Iapetus teaches integrity.

“This is not the same kind of love that Venus teaches. It is through love that leaders become great leaders. It is through love that all problems are solved. It is through love that all becomes eternal. Only love can replace a guru and only love can lead the world to peace and understanding and contentment.

“Love has to be active, it cannot be passive. Even a yogi meditating on the condition of mankind in the Himalayas is actively giving his loving blessing to the world and the world benefits from this.

“But how many yogis and monks are there? Not enough. So it is incumbent on the individual soul to express this active love in everything he or she does while on Earth and while not on Earth.

“Practicing active love also means the application of this in everything they do. You have heard the expression ‘tough love’? Well tough love is the giving into what has to be done to make things right. This is leadership.

“In the end, each of us, each soul, each person must lead himself or herself out of the delusion that is the Earthly existence. We must love ourselves enough to be open and honest with ourselves so that we can objectively analyze what it is we need to do and how to get there.

“We have to love ourselves. Not narcissism. Not egotism. Self-love is affection for what we are, for our Spirit and our Soul. It is an ability to be gentle with ourselves and to tolerate our own faults, but recognize that they need to be correct.

“Do not share all your faults with others. Share them with yourselves or with some confidant who can lovingly help you find ways to cure the fault. Telling everyone what is wrong with you, whether it is character flaws or some illness, does nothing for you or anyone else.

“But the ability to recognize that you have faults and that through love, they can be cured, even made into strengths, is what I teach. This is true leadership of the soul.”

**Thank you very much.**

“You are welcome.”

## Iapetus

Well. Here we are on Iapetus. How are you today?

“Very well and very anxious to tell you about what I have been asked to do. Each Planet Soul plays a role in the Universe. Each soul is not the planet, but plays a role given by God for that particular place in the Universe where souls can develop. It is great honor to become a Planet Soul.

“People who read this should not view this with fear. Only love has created this and all Planet Souls operate only through love.

“This love is Divine Love. It is given by each soul unconditionally to every soul who comes to them for help. No one is turned away, even the worst of the worst. It is not possible for Planet Souls to turn away any truth seeker, even if they are using it for evil or nefarious ends.

“The Love of God permeates everything and it is through His Love that all souls can be redeemed. So nothing is held back from anyone.

“The essence of integrity is honesty with others and one’s self. It is openness and it is love. It is guided by the ability to discriminate between what is good and what is bad.

“One earns integrity, it is not given. The chance to earn it is given.

“All souls should take every opportunity to learn integrity as the essential part of leadership.

“When one has achieved integrity, a form of perfection, as a leader, millions will follow you. And you will lead yourself and others back to That Which Created You In The First Place. God, The Divine Heavenly Father, Divine Mother, Friend and Beloved.

“I may be the smallest moon on Saturn, but my task is the most important. That is what I teach and that is what I do. All for the Glory of the Divine and to help other souls achieve Bliss and Reunion with Spirit.”

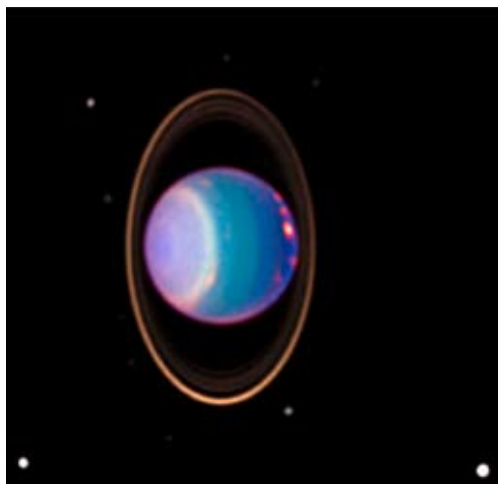

**Thank you very much.**

“You are welcome.”

*Iapetus*

NASA/JPL

*Uranus* NASA/JPL  
*With False Color Rings*

# Uranus

*Uranus is the seventh planet from the Sun and some consider it the most mysterious. One description of the role of Uranus is sensitivity. Let's see.*

“Good afternoon, Greg.

“Uranus is a very interesting planet. The designation ‘sensitiveness’ is not the complete story but it will serve as the beginning or opening of this discussion.

“Each and every soul must learn to be sensitive to its surroundings and the lessons that a soul must learn in order to become the perfect expression of Unconditional Love.

Without a sensitive nature, souls simply cannot learn the emotional side of these lessons. A soul reaches for a perfect balance between reason and feeling. Without the sensitivity to understand ones feelings and emotions, one cannot accurately and truthfully relate to other souls, be they men or women, alive or ‘dead’, young or old.

“Sensitivity does not, of course, refer to being oversensitive. Moderation in all things teaches reason and the adjustment of ones feelings in a moderate way also brings with it wisdom and understanding.

“But there is more to this than meets the eye.

“The true nature of the soul is to be aware of everything around it, that is also, everything going on around it. When a soul incarnates in a human body, it must necessarily shut off certain stimulants and experiences going on around itself so that it can cope with those inputs that it can. To learn the difference between that with which you can cope and that with which you cannot cope is the difference between a successful soul and an unsuccessful one.

“Masters, that is, those who have mastered the physical, astral and causal worlds, are fully aware of everything going on around them. They are completely in tune with the environment and all of the Cosmos, at once. This is omnipresence.

“Uranus teaches omnipresence, not just sensitivity.

“Omnipresence is to be aware of everything going on around you and being able to handle this information in such a way that it does not overwhelm you and in such a way that you can manipulate or change “reality” to suit your purposes.

“How is this done? Well, it is quite simple.

“If one was to live a lifetime on Uranus, you would be subjected to some of the most ferocious forces in the Cosmos, coming at you from all directions at once. This experience sensitizes a soul to the forces and currents of life that flow through the Cosmos at all times.

“The flow of these life currents is at the heart of omnipresence.

“Yogis and monks who practice ‘pranayama’ or the control of this Life Force have spent many long days on Uranus experiencing these forces at work. Once exposed to these Life Currents, the soul then becomes aware, and can become aware, of their nature, which makes them understandable.

“The ability to control and move around this Life Force is one of the keys to reaching Unconditional Love understanding.

“Picture, if you will, a person who doesn’t like the conditions that exist in some circumstance. If he or she wants to change this, by controlling the Life Currents, he or she can instantly change the scene the way they want it to work.

“The person in charge has become sensitive to these Life Currents. The more sensitive they become, with the attendant wisdom and knowledge to do the right thing, the more this person achieves a level of omnipresence.

“Omnipresence and sensitivity are tied together. One must achieve a level of sensitivity of the Life Force Currents in order to achieve omnipresence.

“Now, how does this relate to Unconditional Love?

“Let’s define it. Unconditional Love is the acceptance of all things around you as the reflections and creations of the Creator of all things, the Divine and Ever-loving God. God is in all things and all things are in God. Love His creation as you would love Him. Unconditionally.

“‘Unconditionally’ means ‘without condition’. None of this business where one might say, ‘If God does this for me, I’ll do that for Him’ Or, ‘I’ll love God if He loves me’.

“Unconditional Love recognizes the Divine Energy and Divine Guidance in everything around you. We are all God’s children and one who understands the true meaning of Unconditional Love understands this.

“Unconditional Love does not mean that one has to tolerate everything nor does it mean that one has to lose its ability to discriminate between right and wrong. Just the opposite is true.

“Unconditional Love means that one must learn toleration for the faults that exist in others but knowing that they would be better off if these faults were cured.

This is where guidance comes into play. One’s own guidance of a spiritual nature will tell the soul what is right and wrong. Man’s guidance, unless it comes from a fully Self-Realized soul, is ever unreliable. There is only one guidance that is fully reliable and that is that which comes directly from God to the individual.

“Often this comes from within but it can come from outside experiences as well. Through meditation and scientific meditation techniques, the lessons of spiritual guidance, received through faith, the faith of an innocent child, will be the best guidance one can have.

“One must learn to develop ones sensitivity and sensitive nature so that you become attuned to right thinking as opposed to wrong thinking.

“This is the true essence of the teaching of Uranus.”

*Uranus - Rings Are Black* NASA/JPL

### **Why is the axis of Uranus pointed toward Earth as opposed to about 90 degrees in the rest of the planets in this Solar System?**

“The magnetic poles are at the top and bottom of the axis of any planet. It is here that the energy is collected and released into the Cosmos.

“At this point in the development of mankind, the poles on Uranus must be pointed toward Earth so that souls can get the most benefit from the teaching of this planet.

“As the souls on Earth develop sensitivity of others and of God, this position will no longer be necessary and the planet will shift position.

“Think of it very much like streaming energy directed directly at Earth as in a particle beam. Right now, the Earthlings need to be aware that they have shut themselves down from interacting with others simply because there is too much going on around them. So they need this extra boost that the position of Uranus can provide at this stage in the development of those souls who chose to develop Unconditional Love by living a physical existence on Earth.”

**Uranus has five moons of similar size. With the exception of Jupiter, which has four moons of roughly similar size, no other planet has this. Why five moons and why of similar size?**

“This is a very thoughtful question that deserves a thoughtful answer.

“The moons of Uranus, like all other moons around all other planets, balance and serve the role of the planet. It is the nature of sensitivity on the Earthly plane that a soul has five senses. There are five moons because there are five physical senses - taste, touch, sight, sound and smell - and reason and feeling to interpret these senses. Intuition, the Guiding Light of meditation, wraps these all together into enlightenment and wisdom.

“Each moon represents one physical sense. Each moon can be a place to live to improve one’s senses too. When you talk with each moon, they will tell you which sense they provide. When a soul lives on one of these moons, not in a physical body of course, that sense can improve. When one wants to improve a sense while in a physical body, one only need to meditate on that moon and ask for help and guidance. The Moon Soul inhabiting that moon is obligated by its position and ability to help all souls unconditionally. Again, Unconditional Love.

“This is an amazing Universe. All things have been anticipated by God, the Divine Creator of All things.”

**Thank you very much.**

“You are welcome.”

*Titania - Moon of Uranus* NASA/JPL

## Titania

### May I please speak with Titania?

“Good afternoon Greg. Don’t let our relative sizes fool you. Each moon in this Solar System requires a soul who is just as capable as any other Planet Soul. We work together.

“Life as a Planet Soul is such that we cannot disobey the Laws of God no matter how hard we try, though none would try anyway. It is just that at this plane of existence, there are rules which a soul living on Earth would not, or might not understand.

“Souls on Earth are given the gift and luxury of Free Will to do the right thing or the wrong thing. We do not have that luxury.

“On the other hand, living in perfect concert with God’s Laws actually gives us the freedom to live in His Universe Freely, performing the tasks that God assigns and seeks help from His children.

“This is a difficult concept for many Earthlings to understand. That is, living within God’s Universal Laws is actually the perfect expression of Freedom. Earthly souls equate Free Will with Freedom. They are not one and the same.

“You ask which physical sense I teach. Titania teaches touch.

“What is touch? It is the ability to feel something physically, describe it, react to it, sense it’s nature - soft, hard, rough, smooth, liquid, solid or gaseous in nature.

“Touch from a spiritual perspective is the ability to sense the nature of that which is around you in physical form, it’s shape, size, even color. As a physical sense, it is the first and most important of all and the last to go just before hearing when the body dies.

“This is so important for when the soul crosses over, it is best for someone to be touching that person, to ease the transition, then speak in their ear that you love them. This greatly eases the separation. To die in someone’s arms is the one true way to ease the transition between ‘life’ and ‘death’.

“If a soul wishes to learn all that there is to know about the sense of touch, and how it is important for the soul to learn this, simply meditate on Titania and that wisdom and knowledge will flow to you.

“We might also add that all communications between the moons of Uranus and the soul pass through the Uranus Planet Soul and are directed directly at the individual soul. Beware, sometimes these feelings can be overwhelming at first. But keep at it. Things will ease and new insights into touch and the sense of touch will come to you.”

**Thank you.**

“You are very welcome.”

*Oberon*

NASA/JPL

## Oberon

**Next on the list is Oberon. What sense do you teach?**

“We teach the sense of feeling through taste. The tongue is a sensitive organ and extremely complex. Everything in Nature has a feeling through the sense of touch, which the tongue is fully capable of doing, but the taste buds, one of God’s greatest creations, represent one of God’s greatest ideas.

“Although there are far more senses than the five physical ones, these five are there so that souls can interact with the Earthly environment both with knowledge and wisdom, and with pleasure.

“Isn’t it interesting that everything on Earth has a taste to it? Bitter, sweet, sour or salty, everything has a taste. Most in combinations. Each part of your tongue has different taste buds that can sense different flavors.

“Now, why is this? Is it to give the soul a fuller experience? Yes, that it does. Is it to give the soul a sensory experience that attracts them to the Earthly existence? Yes, it does that too.

“So, you see, this is a double edged experience. At once the soul can live in and describe, even enjoy their Earthly environment, and, be drawn into the repetitive cycles of incarnation after incarnation, seeking the physical pleasures of physical existence.

“The five senses both teach the soul its true nature, and they provide a way along the way to enjoy the lessons.

“The sense of taste is the most pleasurable of all the five senses. And the most dangerous. If one lives one’s existence for purely sense pleasures, the soul never learns the lessons that can lead to an acceptance and understanding of Unconditional Love.

“So this is the perspective that I teach. How to enjoy life on Earth, while being able to release yourself from that which draws you back there.”

**That leaves sight, sound and smell.**

## Umbriel

*It is said that God comes in silence like a thief in the night to steal your heart away.*

### **Umbriel please.**

“Good afternoon, Greg. It is so nice to make your acquaintance. We’ve heard so much about you and this project. We naturally give it our full support.

“I am related to and teach the sense of sound.

“Sound is the ability to hear, obviously. But hear what? There is outer sound and then there is the inner voice that tells you what is right from wrong, warns you of something coming, or going, gives you advice on what to do and so on.

“Hearing is not simply listening to everything around you. It is listening to that which comes from within.

“When you meditate, or pray, you listen to that inner voice that is guidance for you. People often ‘hear’ many things when they are quiet. God comes to people in silence.

“While it is joyful and uplifting to sing praises to God, to make a big deal out of self-flagellation or in other ways distract your hearing, your inner hearing, from your surroundings, it does not allow God, who comes in silence, to speak directly to you. Only quiet does that.

“Many people believe that the chorus of voices brings God to them. While this can help, it is difficult to hear that inner voice when a bunch of people around you are singing and banging things.

“Music is the precursor, or should be the precursor, to quiet meditation. In the contemplative life, one develops the ability to hear from within as well as from without, with equal clarity.

“And clarity, that is the key to hearing. As with Mercury, where one learns the lessons of accuracy of communication, Umbriel is the place where souls learn to clearly hear what is being said to them. They come here to develop the skills of personal discrimination, not race from race, but truth from falsehood.

“To hear clearly, accurately and honestly is the goal of all souls.

“There are many bad souls out there who would use others for their own purposes. The individual soul needs to learn the lessons of Umbriel so that they can listen to someone and walk away actually knowing the truth.

“This can mean that someone listens to the truth and recognizes, or that they listen to a falsehood and can discriminate in their minds what is really being said, and discard or ignore it.

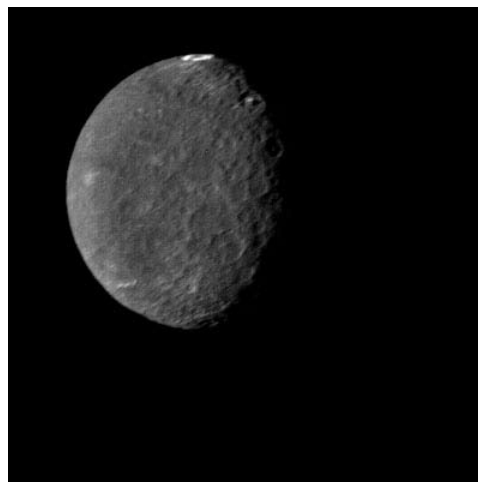

“Clarity of hearing leads to clarity of thought, reason and feeling.

“That is the message from Umbriel.”

### **Very clear statement. Thank you very much.**

“You are welcome.”

### **That leaves two senses - sight and smell.**

*Umbriel*

NASA/JPL

## Ariel

### **Ariel please. What do you do?**

“Well, good afternoon Greg. I am the sense of smell. I can release people from their feelings, change the way people see things, enhance their sense of taste and alter their sense of touch. I am the chessboard Knight of the five physical senses.

“As such, it is possible to influence people’s thoughts, reasons and feelings directly through the olfactory senses. What a wonderful gift! Imagine being able to influence others in their everyday lives by simply adding yourself to the mix?

“This then is the true meaning of the sense of smell. It is the ability to identify what is happening - good or bad - good smell or bad smell - and use that awareness to change things for the better.

“Yes, it is true, that surrounding ones self with pleasant smelling flowers and fragrances, delicious smelling food and such enhances the physical experience. But also think about the power of smells.

“Science has shown that memories are always associated with smells. Science has also shown that the human brain can identify over 300,000 different smells. Animals, such as dogs, can sense ten times that! What an amazing organ.

“Why is this gift given to mankind? It is to provide a way for the individual soul to remember what they should remember, not just in the abstract of the mind, but in the multidimensional realm of the senses.

“It is well established that if someone is exposed to a smell from childhood, that it will trigger a memory almost immediately. At the very least, it will trigger a feeling or emotion.

“So, we have a sense that influences all that the soul is and can be.

“How does this relate to Unconditional Love?

“We learn love from our past experiences. If we cannot remember them, we cannot learn from them. The sense of smell allows us to remember that which we might not be able to recall, and that is the lesson of Ariel.”

### **Thank you very much.**

“You are indeed welcome.”

*Ariel*

NASA/JPL

*Miranda*

NASA/JPL

## Miranda

*The fifth moon of Uranus.*

### **That leaves the sense of sight. Is this correct?**

“Yes indeed it is. And what a beautiful world, what a beautiful Universe and Cosmos it is.

“Sight, as you are now very aware, is far more than what we see. Within the physical spectrum are perhaps a few million colors. But what about outside that spectrum? How about a few more trillion colors? Perhaps an infinite number of colors?

“The ability to see things, as with all the other senses, is capped by the ability to see things clearly. Distortions in appearance lead to distortions in thinking, reason and feelings.

“Every sense has a physical meaning and a spiritual meaning. All five senses revolve around the ability to sense things clearly, accurately and truthfully.

“When we see something in the physical form, what is happening? We pick up images that form a pattern which we can identify, most of the time. We say, ‘That is a box’, or ‘I see a cloud in the sky’. We can put things that we see into a larger perspective.

“Isn’t that the same with life. Isn’t everything we see carried within a larger perspective?

“God created everything and everything is within God. Spirit is in everything and everything is within Spirit.

“The ability to ‘see’ God, Spirit, is the ability to recognize the true nature of reality. This leads to discovering the true nature of one’s Self, that is the true spiritual nature of one’s Self. Not the ego or the id. Not the ‘I am’ that is so popular among many people. But the true spiritual Self also called the soul.

“Your soul nature is a reflection of the Divine Creator of you. Can you be any less Divine than God? No, it is not possible. Except through ignorance of God, every soul eventually finds their true nature, the true Self.

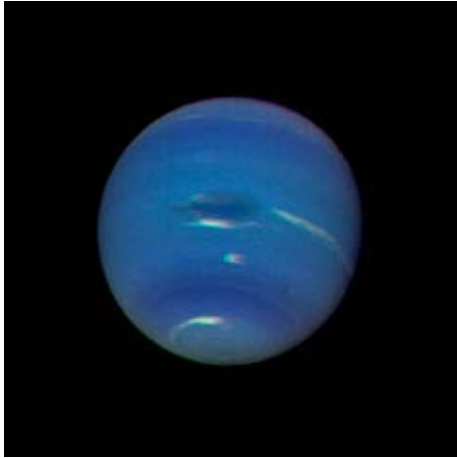

“To see that nature is where I come in. In teaching one to ‘see’, I help souls learn to see accurately, clearly and truthfully.

“Come to me in meditation, and I will show you things you never could have imagined. Come to me and I will reveal the Universe to you. Then, take that experience, and give it to God, From Whence You Came.

“That is the true path to enlightenment.”

**Wow. Thank you so much.**

“You are welcome.”

*Neptune* NASA/JPL

# Neptune

*Neptune is the water planet. Water, in this case, is mutable and immutable. It is solid, liquid or gaseous. It is the Nature of God personified. Let's learn what Neptune has to teach us.*

“Good morning Greg. It is a glorious role that I play in the Universe. Many see me as the Old Man of the Sea. That is my nature to be sure, but like all Planet Souls, I have specific duties and must meet specific requirements to serve in this

role.

“The mutable nature of water is my directive. Water is fluid, solid and gaseous as you know. It is my nature to be all three. To work with the souls in this environment we call the Solar System, it is essential for all Planet Souls to practice and teach the various lessons that the souls in this system must learn. But more so, we must hold the Solar System together in a cohesive body that will provide the sustenance for the growth of all souls toward perfection.

“In my case, I provide not just the water element, but the changeless changeability that is reflective of the Creator. While water may change in form, it does not appreciably change in substance. I say not ‘appreciably’ since during the change from solid to liquid to gas, there is some basic change not just in the physical structure but in the molecular structure at the higher astral and etheric levels. You may remember that Dr. Steiner stated that hydrogen is the element closest to the Creator. This is, of course, true. In this position, hydrogen has the capability of commanding the movement of the Creative Force to the other elements and effectively communicating these Life Force Energies directly to the other elements. In the case of H<sub>2</sub>O, or water, we find that hydrogen brings or assists in bringing the Life Force Energy directly to oxygen which then carries this Life Force Energy directly to all living and seemingly non-living things like minerals.

“It is my duty to oversee this process within the physical, astral and etheric or causal planes for the development of life on Earth. It is my duty to influence the movement of this intelligent Life Force into everything living in, within and on the Earth. Thus, when the light from the planet Neptune shines down on the Earth, and by way of the Moon and other bodies, reflects on the Earth, and by way of the Sun, shines through the Earthly bodies, my efforts serve to bring the Life Force Energy (sometimes called the Life Current, Prana, Chi, Ki, Mana, The Word or the Breath of Life) directly to those who need it to sustain life.

“How is this knowledge helpful in, for example, gardens and fields? The location of the planet Neptune will influence the intelligent use of water. That is, the location of Neptune will have a direct influence on the movement of water and the intelligent Life Force Energy into the seed and into the plant. So it is important to consider the location of the planet Neptune whenever you plant, cultivate or harvest your vegetables.

“If Neptune is located behind the sun, that is, if the Sun is located directly between the Earth and Neptune, we have the additional influence of the Sun's energy radiating on the Earth. This brings a significant increase in the power of influence from Neptune.

“If Neptune is located opposite the Sun such that the Earth is between the Sun and Neptune,

we have the reflected power of Neptune working on the Earthly bodies.

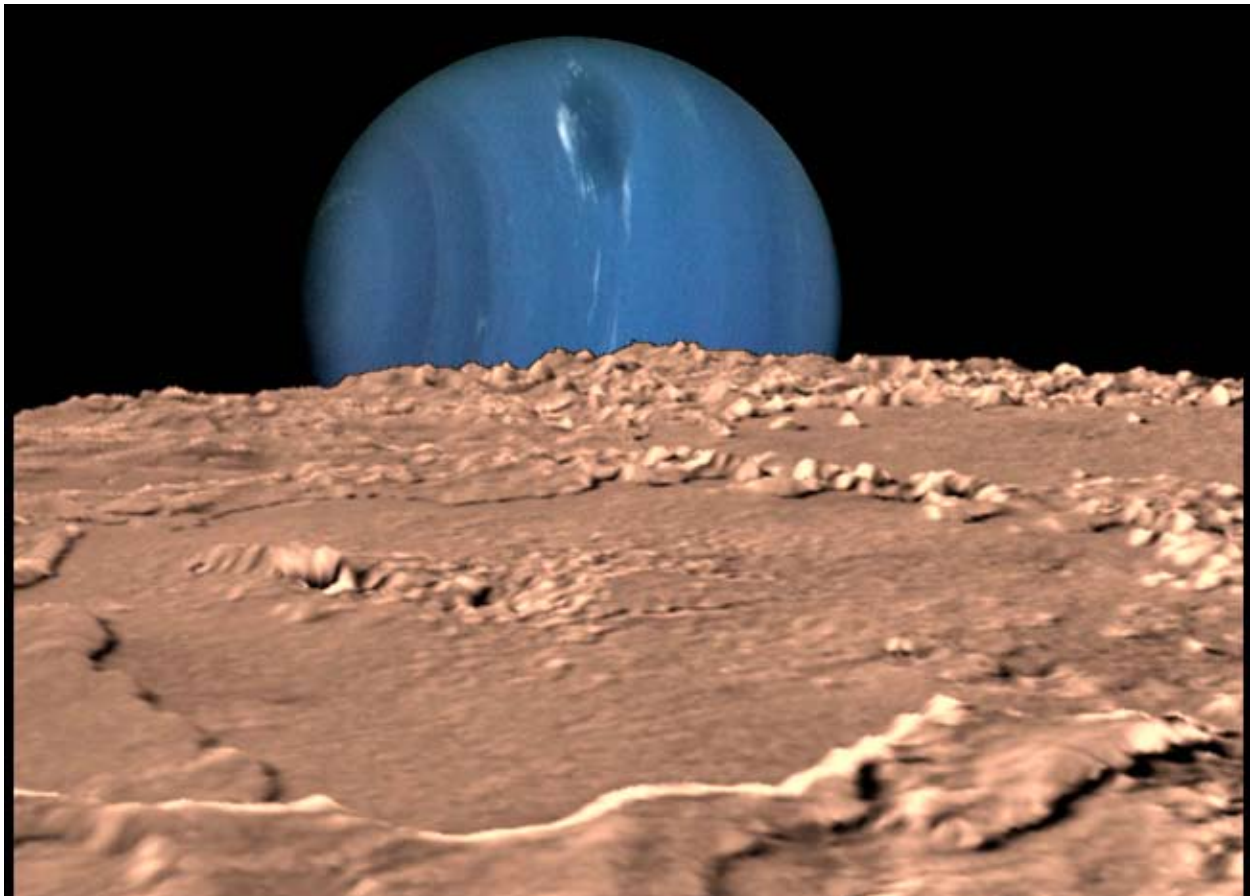

“What this means is that at these two times, it is especially good to plant seeds. As the intelligent Life Force Energy streams into the seed, chaos, which is the hallmark of the seed, begins to disappear and the organization that is the hallmark of the formative process develops. This does not mean that it is not possible to plant at other times. We are simply pointing out that this is an especially good time to plant seeds. It is also an excellent time to transplant.

“There are also, of course, many other considerations but this is one important concern.

“The role, then, of Neptune, to guide this Creative or Intelligent Life Force Energy into the Earthly bodies is my primary role. You have perceived that there is a sense of enchantment brought by Neptune. This is also true. The enchantment that you perceive is a direct result of the inflow of the Creative Life Force Energy into an Earthly body. This enchantment is a reflection of the Creator’s love for all His children. The mutable nature of water, the changeless changeable nature of God brings this enchantment.

“Think how wonderful it would be to have a parent who is ever loving, ever there, ever consistent yet provides each of His/Her children with an ever new, ever renewing scene to enchant them, entertain them and enlighten them. Water is changeable yet ever changeless. That is the Nature of God. Changeless Change. It is my duty, my responsibility, to bring this influence directly to human souls seeking to understand Unconditional Love. That is my role in this Solar System, and in the Universe.”

### *Neptune Rising From Triton*

NASA/JPL

*Triton*

NASA/JPL

## Triton

*Triton is one of two major moons of Neptune. The other moon is Nereid.*

### **May I please speak with Triton?**

“Let us begin. Neptune is here to teach the essential nature of God, which is changeless change. The two moons on Neptune, of dramatically different sizes, represent the extremes of changeless change. Both are important.”

**Please hold a moment. I sense a feeling of deep, deep serious within you that I have not sensed from any other**

### **moon or planet. What’s up?**

“Nothing is more serious than for the soul to understand that while everything changes, nothing really changes.

“As Luther Burbank and Paramahansa Yogananda<sup>(4)</sup> observed, every potential in a plant was put there at the instant of its creation. The changes that Burbank was able to bring out in a plant were already manifested in it at its creation. Bringing out the physical reality of its etheric sense was the key to his horticultural advances, and is the key to the creation of all things.

“Everything that ever will be created was created. It is only to be discovered.

“The essence of God, the Divine Creator of All Things, is that He/She created everything when the thought occurred to It that life for itself would be more comfortable and more interesting if It had children.

“We see this in many people who long for children of their own. Are they so different in their desire for friendship than God? No. Of course not. They are each made in God’s image.

“Just as the love of a mother is given to its baby, the love of a father is also given to its child, so too does God give to all His children the same love. It is Unconditional Love.

“Does a natural mother give conditional love to her newborn? Not often. She gives Unconditional Love to her offspring. So, of course, do fathers. It is that moment in time that all souls should remember and carry with them through their lifetimes, and practice it whenever and wherever they can.

“This is changeless change. To practice the changeless Unconditional Love for your child is to practice the same Unconditional Love of your Heavenly Father, Divine Mother.

“So, learn the lesson of changlessness. Love all things Unconditionally.

“At the other extreme, we love nothing but that is not the role of Nereid. We are here to show people and to teach souls the extremes that changeless change can move from and to.

“As with water, which can be solid, liquid or gas, so can Unconditional Love. It can be very specific in its nature or it can be very large, encompassing all Creation.

“The Moons of Neptune, Triton and Nereid, are there to show people how to become loving in a very specific way, with something or someone else, or, to learn how to express that Unconditional Love in a Cosmic way.

“When a soul meditates on Triton, it becomes aware of the vastness of the Cosmos and the essential soul quality within all things.

“All things exist in God and Spirit and God and Spirit exist in all things. When the soul sees this, when he or she internalizes this expression of God’s Love, then it begins its journey back to God, as it should.

“Now speak to Nereid for the other side of this story.”

## Nereid

“Hello Greg, it is a pleasure to speak with you. Don’t be fooled by our relative sizes, we are both souls of equal development. It is essential that we be of equal development since both tasks, Cosmic Love and family or specific Unconditional Love are equally important.

“The love of a child by its parent is the same as the love of God for His/Her children. However, often, on the physical plane, that is, on Earth, this is expressed imperfectly. Too often, parents love their children conditionally, often as they were taught.

“I am here to help souls develop Unconditional Love for their families and friends. Cosmic Unconditional Love starts here. Our relative sizes reflect the relative differences in the band of souls a person learns to love unconditionally.

“What I also teach is discrimination. All too often, souls on the path to learning Unconditional Love confuse it with unconditional tolerance for all forms of life and activities. They are not the same. To learn to discriminate between right and wrong, to learn to discriminate between good and evil, is the goal of the soul during its development. Tolerance for all things only leads to a misapplication of Unconditional Love.

“One should not tolerate all things, especially in one’s self. This leads to internal, then external destruction.

“The mind must learn to discriminate between what is good and what is bad. What is positive or negative for the advancement of that soul. Then it must practice, not preach it. The best preachers practice these qualities and live their lives by example. A true Guru leads the soul down the path of enlightenment, not the destruction of self. A true preacher leads his or her flock down the path of enlightenment, demanding nothing, teaching by example and passing on the best wisdom, knowledge and enlightenment that they can to their flock.

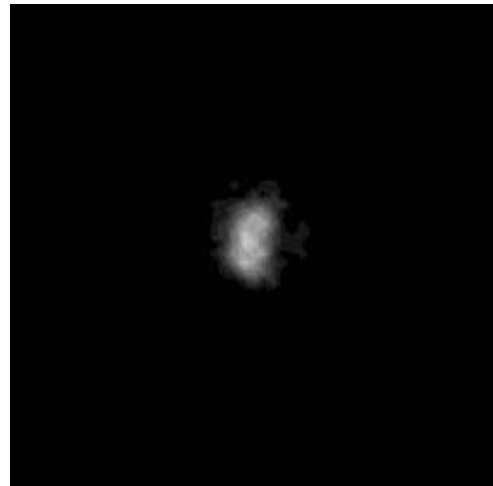

“In the same way, the soul learns enlightenment and expresses it within his or her family, eventually as Unconditional Love.

“I am here to teach all souls how to do this. Triton is here to teach all souls how to do this in a cosmic way.

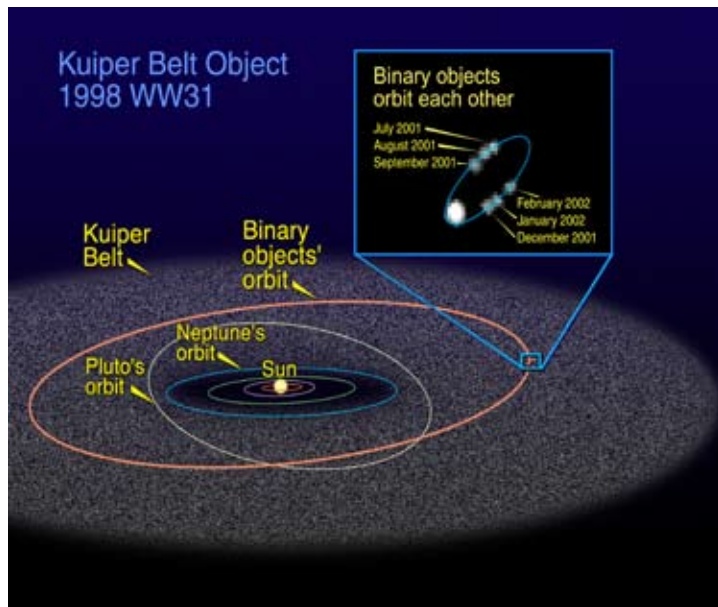

“Both of us work through Neptune to enlighten souls on the true Nature of God, and the true Nature of the Self, the Soul. That is what we do.”

**Thank you very much.**

“You are welcome.”

*Nereid - Best Image* NASA/JPL

*Kuiper Belt Illustration*

NASA/JPL

# Kuiper Belt

*The Kuiper Belt is a vast reservoir of billions of icy rocks just beyond Neptune. Is there a Planet Soul responsible for them?*

“The question is funny because there is no planet here. On the other hand, there is a soul, much like a Deva, responsible for this area of space and the physical matter with it.

“This space is for the lesser criminals and destructive souls to come to live, not in complete isolation like they must

in the Asteroid Belt, but with other souls of similar development. There must be a place in the Solar System for souls to go to contemplate their commissions and omissions with other souls of like development.

“Many souls do not wish to go to the planets Jupiter and others to learn the lessons of life, but instead, to descend into a kind of communal Hell where they can commiserate with each other until they are ready to reincarnate again.

“These souls must be taken out of circulation, so to speak, for some time so that they can develop some Self or Soul awareness which is lacking in their character.

“These are not the worst of the worst, but they are bad. The killers, rapists and destroyers of opportunities all must come here to contemplate their futures. Some are too bad for life on Jupiter but have sufficient good in them to be retrained in their Soul natures. Some spend eons here. Some, in fact, stay here so long that they will miss the 24,000 year cycle all together.<sup>(5)</sup> But it is still a shorter time than a stay in the Asteroid Belt.

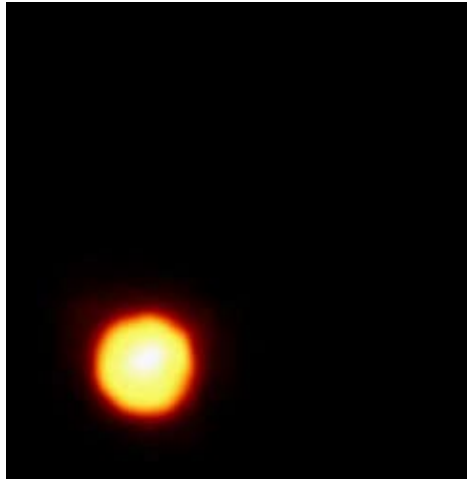

“There are also spiritual teachers here who move among the ‘rocks’ in the Kuiper Belt, ministering to the souls entrapped there. Some of these entrapped souls will go on to live a life on Jupiter, and some will not. Jupiter is their only exit point.

“The location of the Kuiper Belt next to Neptune is also important since Neptune teaches the essential Nature of The Creator of All Things. Living their lives out next to this example of the True Nature of God has a positive influence on them.

“It is important to understand that God has made provisions for all souls to learn Unconditional Love, and this is just one of them.”

**Well, thank you very much.**

“You are welcome.”

*Pluto*

NASA/JPL

# Pluto

*The planet Pluto is often considered the furthest from the Sun. It is and it isn't. It's role is crucial to the survival of all life on Earth, and, as we shall see, life outside of our Solar System. This is one happy soul.*

“Good morning. Although I am very cold on the outside, I am very hot on the inside. My purpose in your Solar System is to provide the balance needed to offset the fiery nature of the Sun. Without the planet Pluto, it would be impossible for life to exist on the Earth. The nature of

Pluto is to provide balance in the system. More than that, it is to provide a resting place at the outer perimeter of the Solar System for the energies that emanate from the Sun and other planets and moons in the system. As the resting place, it is necessary for me to allow those thoughts and energies not to become entangled with each other and with me. So I, in a sense, monitor all that emanates from this system before it goes to other systems. This is a very important job and I take it quite seriously. The Tuxedo nature that you feel is the happiness with which I perform this duty. In a very real sense it is like being at a constant party. These thoughts and cosmic life force energies that emanate from the bodies within this Solar System are, individually, just like having guests in my home. Each is unique. As you can imagine, there are almost countless numbers so it keeps me pretty busy.

“My other duty as a Planet Soul is to guide these thoughts and life giving energies outward into the Cosmos so that they are most effective in their life purposes. This is also an essential responsibility for a soul such as me.

“You will find that in each of the billions of Solar Systems around this particular Universe, that there are many ‘Plutos’. Each Solar System is essentially the same in its makeup. There is a Soul/Sun around which the planets and moons circumnavigate. At the outer edge is the planet responsible for the balance and the movement of the emanations from the planet bodies within the Solar System.

“So my job is not unique in the sense that there are many others doing the same thing. But each Solar System is unique as is each soul in that system. Add to this the fact that all thoughts of sentient beings within that system also must pass through my purview before they move on to the Cosmos, and you have a very busy Planet Soul indeed. Only the oldest and most developed of souls can hope to become a Pluto type soul. It is very busy here all the time. That is my role in this Solar System.”

## **And what would happen of you did not exist or you failed to do your job?**

“Chaos in the Universe. The Creator has determined that there will be order. Each of us Planet Souls has a job, a very important and critical job. Without these souls, there would be chaos. Planets bumping into each other. This is not the order of a dictatorship. This is the order that comes from love only. Our job is to provide a place to develop for the emerging and maturing souls. The entire Solar System is engaged in this process. Not just the planet Earth. She is the primary home

for souls in the physical presence but she is equal to all the other planets and moons in this Solar System. We are all here to work in harmony and love to provide souls such as yourself a place to develop pure Unconditional Love.”

**Why are there so many planets in this Solar System?**

“Each represents a slightly different lesson to learn. Each is available to learn these lessons. Some on the physical plane, some on the astral plane. All exist for you.”

## Charon

*Charon orbits around Pluto.*

“Good evening Greg. It is a pleasure to speak with you. As you noted with Pluto that he is quite a party guy, so am I, but you would have to say that I am a party girl. While Pluto manifests the masculine side of the Universe, I manifest the feminine side of the Universe.

“Why, you ask? This is because there are both reasoned and unreasoned thoughts, and constructive and deconstructive feelings and emotions emanating from this Solar System. They both have to be filtered out before they pollute the Galaxy and the rest of the Cosmos.

“Although we are certainly different sizes, we are equal in our abilities to filter out the bad and leave the good.

“God does not want the immature emanations of souls in development spewing out into the Cosmos where they would interrupt the development of other souls.

“This concept that there are other life forms in the Galaxy and the Universe that you can perceive is controversial to some, and not to others. Let it be clearly understood that the Creator of All That Is has created uncounted planets, Solar Systems, Galaxy Systems and Universes for souls to be created, developed, brought back to the Divine Originator and, in some cases, destroyed. All are given an equal chance to develop Unconditional Love, the basis of all returning souls.

“Unconditional Love. Think about that for a moment. What is it exactly?

“It is the ability to act in perfect harmony with the Divine. It is the ability to love another without making constraints on the emotion or the relationship. It is also the recognition that every soul is a son or daughter of God and as such, deserves our respect and love.

“What it is not is the unbridled tolerance of any act that another does, regardless of its benefit or destructiveness.

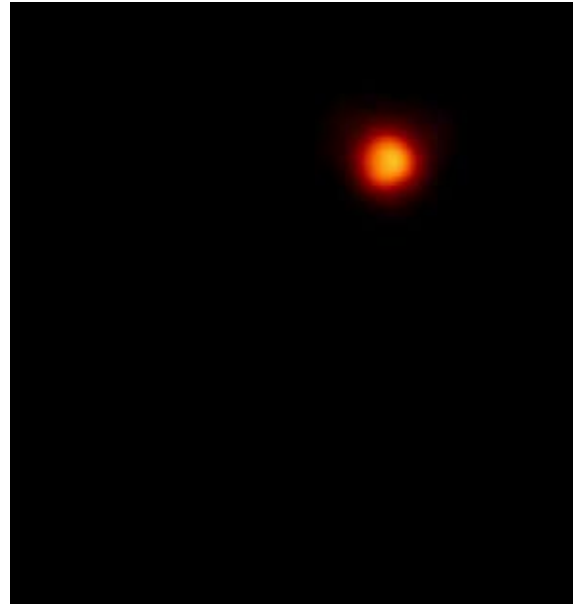

“In the Earthly world today is much confusion regarding Unconditional Love. Many believe that it is tolerance for anything. This leads to more confusion and destructiveness and is of no benefit to anyone except to learn from the mistakes of others.

“Why is it important to bring this up? It is because the purpose and role of Pluto and Charon is to filter out anything that would lead to the unpleasantness that hypertolerance causes. It is our role to filter out all the negative energies and this is certainly one of the most common today.

“Tolerance of violence, murder, rape, theft and yes, even the environment, are all acts that must be filtered out.

“The emotions that these acts wreck havoc with are demonstrably some of the most brutal in the world. They must not be allowed to spew out into the Cosmos to infect and dilute the efforts of other souls.

“The Earth Solar System is one of the places in the Universe where souls have Free Will to do pretty much anything they wish to do. But it is our task to protect the rest of the Universe from

*Charon*

NASA/JPL

the bad souls and to enhance and improve the lives of souls from the acts of the good ones.

“This is the role of Pluto - Charon.”

**This raises a question. What do you do with the bad stuff filtered out? Where does it go?**

“Excellent question. It goes to the Cosmic Dump. This is a place in the Universe where all is destroyed. It is not salvaged or saved. All is destroyed as if it never existed. Only God can do this. We just send it there.”

**And where is it located?**

“In the Universe. Not close to Earth or this Galaxy. That is all that we can say.”

**Thank you very much.**

*Artist Concept Of Sedna*

NASA/JPL

## Sedna

*Sedna, only recently discovered, located further out than Pluto, is the outermost known planet of our Solar System.*

“Good afternoon Greg.

“You can see by your feelings that I am quite serious. Don’t let the  $-400^{\circ}$  temperature fool you. The fact that I am located so far from the Sun gives rise to these extremely cold temperatures. But my work is white hot.

“It is my job to defend and protect all the inner planets of the solar system from the vibrations and frequencies of outer space and the Cosmos around which, and in which, the Earth Solar System is located.

“Just as Pluto filters all the negative vibrations and frequencies emanating from within the system, it is my job to filter out all the escaped negative and potentially damaging vibrations, thoughts and frequencies from the rest of ‘space’.

“This, like Pluto, is not a job for any undeveloped soul. Even though all Planet Souls exist on a higher plane than Earthly souls, that does not mean that we all did not have to go through extensive training and millions, if not billions of years of evolutionary development. Not only must Planet Souls learn Unconditional Love, they must develop their ability to discriminate between that which is good and that which is bad to the highest, godlike ability.

“All Planet Souls must function and complete their duties in complete harmony and accord with the Divine Creator of All.

“Many Planet Souls have lived lives on the Earthly plane but none of those souls inhabit any Earth Solar Systems, they reside elsewhere.

“Then there are planets in the solar system that are not available to the physical light spectrum. To most, these planets live ‘in other dimensions’, which is true in a sense, but not true in the Universal Order of Things.

“Just as all Laws of the Universe exist within the Mind of God, so too do all things exist in Unity, both physical, that is, within the realm of the five senses, what you call the physical world, and the ‘nonphysical’, what you call extra-physical in nature. These planets too must have souls to guide and protect them, to carry out their roles and duties in the world.

“The Universe is a carefully created home for souls to learn Unconditional Love. The many conflicts that exist between the Creationists and the Darwinists are really moot. God Create All and All reside within God.

“As such, the unfolding of the Darwinian theory that all things evolved from a previous physical pattern is true. And it is equally true that all things evolved in such a way, as defined and guided by the Divine Creator, to be available to souls to learn the lessons of the soul and to discover the true nature of the Self, or the Spirit-Soul which resides in everyone.

“So it is the wish of the Creator to have a place for souls to evolve but, at the same time, all is orchestrated by the Divine.

“When viewed from this perspective, we can see that both Darwinism and Creationism are one and the same.

“At some point in the development of bodies for souls in which to develop their skills, the souls entered the bodies in toto, that is, in full. Until that happened on Earth, souls, which are highly complicated beings, could only partially enter the bodies available to them, since they lacked the fullest expression of Free Will with the limited intelligence and physical ability. It was only when the human body reached its present level of perfection, erect homo sapiens of the modern era (defined as occurring just before the advent of Atlantis up until now), that the human body was sufficiently perfected for the entire soul to enter it.

“Why is all this important to the role of Sedna in the Universe and in the Solar System?

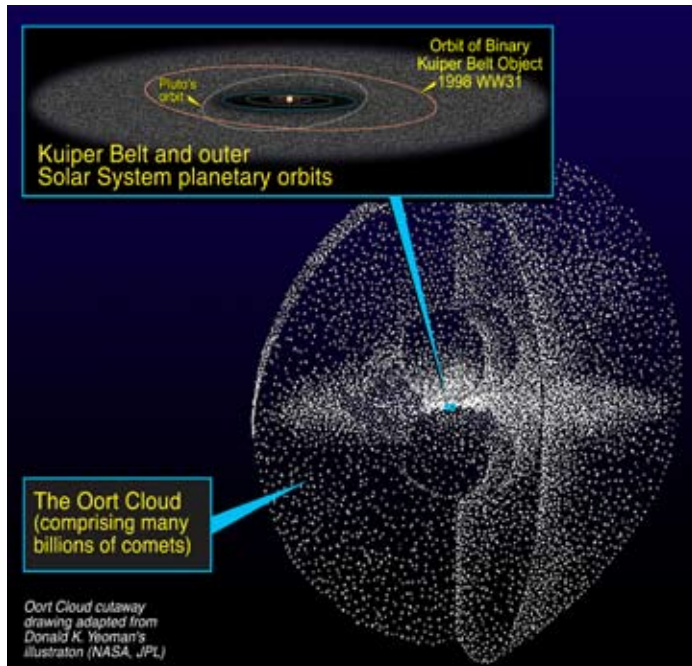

“Sedna prevents the extraneous and damaging thoughts and objects from entering the solar system that would have prevented, damaged or delayed the formation of the human body.

“Just as Pluto filters out the negative energies before they *escape* to the outer regions, it is my role or job to filter out the negative energies before they *enter* the Solar System. This, thus, makes it possible for the human body to be developed in the proper way so that it can give the soul its fullest expression of development and evolution.

“The goal of all souls is to learn Unconditional Love, and once learned, practice it.”

**Thank you very much. This is very, very interesting, and comforting.**

“Good. It is time the world understood the true spiritual nature of the Garden of Eden.”

*Oort Cloud Illustration*

# Oort Cloud

*The Oort Cloud, recently discovered, is literally a cloud of rock-ice formations numbering in the trillions. It is at the very outer edge of the Solar System and defines the outermost physical part of it. It is from this mass of objects that astronomers believe comets are created. It was discovered by Dutch astronomer Jan Henrik Oort. It exists just inside the inner edge of the heliopause, the outer “membrane” of our Solar System. In astronomy, the heliopause is the boundary where the Sun’s solar wind is stopped by the interstellar medium.*

## Oort Cloud Soul please.

“Good afternoon Greg. So nice to make your acquaintance.

“The Oort Cloud, unlike its counterparts the Asteroid Belt and the Kuiper Belt is the temporary home for good souls or tired souls who need a rest, and there are many.

“The evolution of the soul from its incipient state to a fully mature soul that completely understands and practices Unconditional Love, understands its true Soul or Self nature and has made the return trip to That Which Created It, is tiring for many. Where would they go to rest? It is the Oort Cloud.

“Each of these particles of ‘ice and rock’, as they are described, is, in fact, a place of rest and relaxation.

“The soul has the ability to create anything it wishes. So, it is possible for a soul, even an exhausted soul, to create a beach and an ocean in their minds while they reside in the Oort Cloud objects du jour.

“This is the one place in the Solar System that souls can go to completely escape everything. That means they do not have to learn any lessons, or study or have a family, or take care of anyone but themselves for as long as they want to stay here.

“After a while, the soul recovers their strength and desire to return to the path of Enlightenment and continues on their journey.

“Occasionally, when a soul has a really inspirational awakening, it kicks the physical body in which it was staying and sends it toward the sun in a dance of happiness. Sometimes, these comets are the opposite, a soul kicks one out of orbit and sends it into the sun because it is mad and frustrated. In both cases, the soul must make some kind of repairs or amends for their transgressions. This is something positive that they must perform.

“Often times, you will see people in desperate circumstances, rising above it all and becoming saint-like in a lifetime. This is often a soul who kicked out a comet. When a comet is gone from the Oort Cloud, it is no longer available for souls to enter and stay.

“While it is true that an occasional soul will ride a comet, it is not a place for comfort or joy. It is simply a “ride”. Some souls like that.

“So the Oort Cloud is like a hotel in the Cosmos. It is a place where souls come to rest and reclaim their sainthood, their true Selves and their Inspiration to go on to return, as Sons of God, and to learn Love, Unconditional Love.

“This is an amazing Universe. Everything is here for the soul to develop and be entertained in the process. Live a life of happiness in balance and harmony and accord with the Divine, and this kind of happiness will not only come to you, but it will transcend everything you do, say, think and feel. All around you will also be infected with the ‘happiness virus’ and the world will be a better place for all souls there.

“That is the message from the Oort Cloud. We’re betting Dr. Oort never saw this side of his discovery.”

**Are you a Deva or a Planet Soul?**

“Neither. I am the caretaker of the region. I am like a Planet Soul, but in many respects, not like a Planet Soul. I am developed the same way, but not the same way.

“We are equal.”

**Thank you.**

“You are welcome.”

# The Solar System

*Our Solar System In Illustration*

NASA/JPL

**May I please speak with the Overlighting Soul for our Solar System?**

“Good evening Greg. How do you do?”

**Very well, thank you. And you?**

“Very well. Now, on to the Solar System. It is my duty to see to it that everything in this Solar System functions like a fine Swiss watch. Everything must run smoothly.

“You will notice that the planets do not collide with

each other and that stray meteorites do not crash into the planets where they could do any damage. Despite the concerns of the Earth media and occasional souls who just see the bitter end coming in everything they do, the Earth is protected from this kind of disaster.

“But more to the point, it is the destiny of the Earth to provide souls in the physical bodies to live out their lives and learn the lessons of this Universe.

“My job is quite simple. Keep everything functioning as it should. It is no more complicated than that.”

**Thank you very much.**

“You are welcome.”

*A Neighboring Galaxy Photographed  
From The NASA Hubble Telescope*

## The Galaxy

“Good morning Greg. Well, I’ve heard so much about you and this work, I was anxious to put my two cents worth into it.

“The Milky Way Galaxy is like all other Galaxies in that it is a place for planets to be brought together to create a place for souls to develop in accordance with God’s Laws and His Desires.

“While the Solar System is a complete system, self contained in many aspects, it is just part of a greater whole.

“The Milky Way Galaxy is part of the Universe and as such, is just another heavenly body.

“But, let’s get to the most important role that

the Galaxy plays in the Universe.

“Each galaxy, just like each planet, is connected by what the Hawaiian Kahuna Priests call an “‘aka cord’ or a connecting thread of Life Current over which communication is possible. Each Galaxy then knows instantly what is happening in each other galaxy, just as planets can communicate with each other

“The role of the Galaxy is to take these individual planets and organize them into a heavenly body that provides structure for souls to develop.

“In the Universe are many different kinds of souls performing many different kinds of duties. The Human Experience is only one of hundreds of thousands of different soul experiences, from those closest to God to those farthest away from God. All are in His Bosom but many have the freedom to be themselves. As such, there are some souls that have taken the dark path to enlightenment, and others who have taken the Path of Light.

“Within this many faceted Universe are so many diverse and complex species and souls that if there was not some overall organization, chaos would reign in the Cosmos.

“So, it has been set up so that solar systems are organized into galaxies, and galaxies into other bodies, interspersed with nebulae, black holes and the like to give the Universe some overall structure. So you see, as you build out from your small planet into the Cosmos, each step is formed in a very organized manner.

“Now, to some people, at first glance, there is not much organization in the Cosmos. But you will see, on closer inspection, that just like a forest that appears overgrown or disorganized, the Universe appears disorganized but it is anything but disorganized.

“Order, diversity and complexity appear in every environment, all over Earth. While it is difficult to see these patterns, they are still there. It is the same with the Cosmos.

“The role of Galaxy Souls is to keep this organization in place.

“God has set this up so that at every step, there is some soul responsible for keeping things together. While there are some rogue souls, such as Satan and that gang, who would destroy it, the souls in charge are the souls that ultimately rule the Universal Order of Things.

“No negative force can thwart this organization. Nobody. In the end, all souls must know

that the Everloving God will not allow the evil or negative forces to overtake His children.

“It is our job to be sure that does not happen. So, this then is the second responsibility of a Galaxy Soul - to keep the evil forces from entering and destroying the planets under their charge and protection.

“The third responsibility of the Galaxy Soul is to help with the evolution of the soul. While this would seem so much additional work, let it be known that Galaxy Souls are more than up to the job.

“Since we focus on organization, protection and spiritual evolution, any soul who, in meditation or prayer, desires to improve on these skills can come to me and I will help them.

“Like the other Planet Souls, I am always available to any truth seeker whenever they need or desire help. Simply focus on me and I will come.

If a soul desires to temporarily leave the Solar System in which they have chosen to develop, they have that ability. Smart souls will do this on occasion. It works the same with the Solar System Soul as well. In his case, the soul

*10,000 More Galaxies Photographed From The NASA Hubble Telescope*

can learn the responsibility for maintaining a family and keeping it together, while focusing on the overall spiritual development of the individual. Both the Solar System Soul and I are always here at any time to help souls develop Unconditional Love, so that they can return to the Divine Eternal Bliss when they are ready.

“That is the role of the Galaxy Soul and the Milky Way Galaxy.”

**Wow. Thank you very much. It’s all coming together now. What a beautiful Universe. Do the various heavenly bodies teach similar lessons?**

“Yes. Each for its locale and each for the individual development of the souls in their charge. The Solar System in which you live is complete in and of itself and learning from other sections of the Universe, while interesting, would be redundant. Everything you need to learn is in your Solar System, and more importantly, within your Soul and the Spirit which resides within you. This is why in deep meditation and prayer, insights will come to you that are seemingly only available in Scripture. But do not be confused or misled by Earthly thoughts. Focus on the Divine and focus entirely on the Christ Consciousness within. That is where Truth lies. Once found, it will never let you down.

“Only through deep meditation and prayer, with the mind totally focused on the Christ Consciousness within, located between the eyebrows, can a soul become fully Self-Realized. Once that is achieved, a life and an eternity of Bliss is assured.

“Many who have attained this level of spiritual development return to help others. Some return as Planet Souls, Solar System Souls, Galaxy Souls or others who maintain heavenly bodies for the Divine Father.

“There are many souls on Earth right now who have attained an extremely high level of spiritual development who work quietly in their tasks to elevate humanity.

“Although the world today appears to be on the brink of chaos and destruction, this is not God’s Plan. But a cleansing will take place and many souls will cross over to the other side as the Earth shifts its purpose and vibration. Many of these souls will move on to other planets within this Galaxy. Some will not be allowed to move anywhere but to the Asteroid Belt. Some will rest and some will be allowed to reincarnate on Earth again.

“This is all part of God’s Plan to give souls every opportunity to develop Unconditional Love.

“So when you see the changes in the Earth that are going to happen in the next 10 years, keep in mind that this is as it should be. The only thing that can make it worse is the Free Will of the souls who would act in ignorance of God’s Universal Laws, such as the Law of Cause and Effect, who will influence the changes and make them worse or catastrophic.

“Individual souls have the ability to influence the Earth Changes that are going to occur, both positively and negatively. Total destruction is not predetermined. But a cleansing of the Earth is in order for the planet to advance to its next role of working with more highly developed spiritual beings.

“Greed, lust and ignorance are common in the world today. So, in pockets, are deeply spiritual truths and the practitioners of truth. One light removes a great deal of darkness. One spiritual soul can alleviate a lot of pain and suffering.

“We encourage all souls to renounce violence and meditate and pray for peace and understanding in the world. That is the path to Bliss.”

### **What about those who would destroy the environment?**

“Greed and ignorance play an enormous part in the destruction of the Earth body. Solve these problems and the environment will be cleansed and restored. What you think, you create.”

### **Well, thank you very much.**

“You are welcome.”

# A Whole New Universe

*NASA/JPL*

“The Universe was created for the purpose of providing a place for souls to go to learn Unconditional Love as a necessary step to rejoining their Creator. The Universe is a highly complex place and infinite in its diversity, complexity and possibilities.

“The Earth is a place in this particular Solar System and Galaxy where souls can assume a physical form to incarnate life after life to learn the lessons of Love.

“God is not so callous as to create children and not give them every opportunity to learn these lessons and rejoin Him.

“Those who believe that we only live one life are cutting themselves off from the compassion of God, which is fathomless.

“God Loves His children in the same way He loves His Cosmos and every atom in it.

“God is omnipresent. He is aware of every single thing that happens everywhere instantly, past, present and future. Being omnipresent, God has the ability to take care of you, personally. There is no point in time where God is not aware of you and everything you do, say, think and feel. While this is particularly scary to some, who may even block it out, it should bring comfort to all souls who want to learn the lessons of this Earthly Journey.

“The Solar System was created as a whole and complete system or schoolhouse where souls can learn Unconditional Love for one another, for God’s Creation and for God. This Solar System is so complete that souls needn’t go to any other place to learn these lessons.

“The Earth was created out of God’s Joy and Love. Each plant, each mineral, each insect, each animal - everything - was created to delight and inspire all who come here to learn these lessons.

“While life on Earth can be difficult, the beauty of the surroundings is meant to delight all souls living here. The Cosmos, as the new telescopes and the satellites have shown, is full of color and beauty.

“What could be more beautiful than that one moon residing next to Saturn in outer space, floating in space? How utterly magnificent! Stunning in its beauty and simplicity.

“What could be more beautiful than a flower? Both are the same creations of The Divine Creator Of All.

“This world in which we live is a place of beauty and God’s Grace for atonement and for Love. Each soul has in it the ability to learn these lessons quickly and painlessly, though most do not.

“The beauty of a butterfly alighting on a flower is unsurpassed. The Beauty of a child in its mother’s arms is God Itself Incarnate.

“Isn’t the Love of a Mother for her baby the same Love we all want and expect from our Father Mother God?

“The Unconditional Love of God for all of His/Her Creation is unsurpassed. It is the same Limitless Love that we can all learn and all learn to practice.

“It is comforting to know that God loves His children so much that He would create such a place as our Solar System.

“God is Love. All around you is God’s Love for You, personally.

“This is a magnificent place in the Universe. Love it. Respect it. Learn the lessons it affords.

“The Sun, Planets and Moons, and all the other heavenly bodies are here for you to enjoy and to help you learn the lessons that they teach.

“Do not make the mistake of tossing out this advice. Learn what they have to offer. Meditate on these Planets and Moons. They exist for you through the Grace of God.

“Know that they too Love you Unconditionally. That is the message from God. That is the purpose of our Solar System. That is the Truth.”

# Epilogue

What an amazing journey! Who knew? The simple fact is, God loves His Creation and His children.

This book took four years to research and write. It was worth every minute.

The information in this book should be taken at face value. Some will say it's a dream or a fantasy. Others will say it is deep wisdom and knowledge now revealed.

Whatever your particular opinion, there is one thing about these interviews that stands out. It is the constant and recurring theme that every soul comes to Earth to learn Unconditional Love. The Creator of this Solar System and the Universe has made it possible, in a way we never dreamed was imaginable, to help "students" learn these lessons.

God really is not the "fire and brimstone" retaliatory god of the Old Testament. She is not the unforgiving god of fundamentalism. Nor is He/She a god of New Age entanglements with all the "bells and whistles" sometimes ascribed to Her.

The Creator of our planet and our lives is a Joyous, Compassionate, Caring, Loving, Wise, Patient, Tolerant (to a degree) Father - Mother - Friend - Beloved God and Parent.

God IS Love. And YOU are loved. Deeply. By God.

The everlasting beauty of this Earth is profound. The planets, moons and stars are, as you can see by the NASA/JPL images, so beautiful they are almost beyond description.

The incredible pictures taken by the Hubble Telescope and our deep space satellites reveal Heavenly Bodies "out there" that are so amazing, so beautiful, so incredible and have so many colors, we're going to need a new spectrum to define them.

How many are there? One tiny little long distance Hubble Telescope picture of a pinprick in a colorless sky, deep in the Cosmos, reveals 10,000 more galaxies! Each galaxy has 100,000 stars! Each star has dozens of planets and moons. How can you wrap your mind around that? How many souls are there in the Universe?

It's mind boggling. It's overwhelming. "Incredible" is an insufficient word.

Through the Grace of God, everything we need to learn about Unconditional Love, we can learn right here. Our Solar System is Whole and Complete. Our Universe is Whole and Complete. God is Whole and Complete. So we can become Whole and Complete.

In the end, it all comes back to the reason WHY we're here, the purpose of life.

We are here, all of us, to learn Unconditional Love. The good guys. The bad guys. Everybody.

As with God, the Angels and the Archangels, all of the Planet Souls, fully Self-Realized Masters, compassionate, loving, caring, wise, knowledgeable and reliable, are with us to teach us what we need to know to learn Unconditional Love, whenever, and wherever, we want to learn. Just ask and meditate. How amazing!

So why wait? Go for it.

# Footnotes

1. (p.11) The previously published book by this author, *The Lost Secrets Of The Garden*, includes extensive interviews with the Planet Earth Soul, the Moon and the Sun as well as scientists, saints and world teachers.

2. (p.12) *The Lost Secrets Of The Garden* contains an extensive interview with Luther Burbank about the Universal Laws and how he used them to create over 800 new commercial plant species.

3. (p.25) Paramahansa Yogananda, who came to the United States in 1920 to form Self-Realization Fellowship, is renowned as one of the greatest Yogis ever to grace India, or the West. Recognized in India and abroad as an Avatar or “Perfected One”, he came to America in 1920 to teach that all religions have basic, essential truths, regardless of their practices, and, to teach students Kriya Yoga which he said was the “Comforter” described in the New Testament of the Bible. Paramahansa Yogananda was the fourth and last in a line of Masters starting with Mahavatar Babaji who rediscovered Kriya Yoga and passed it on to his students, ultimately ending with Paramahansa Yogananda. Only two monks in the Swami Order were bestowed the highest title of “Paramahansa” in the 20<sup>th</sup> Century.

Kriya Yoga is a breathing technique that takes at least one year of deep and sincere practice to qualify to learn. The practice of Kriya Yoga frees the soul from repeated reincarnations and the desire for Earthly entanglements. Each Kriya breathing cycle burns up one year of your Karma, shortening and speeding up the time left to return to your Divine Father/Mother.

For more information, contact the Self-Realization Fellowship, 3880 San Rafael Ave., Los Angeles, CA 90065 U.S.A. Telephone (323) 225-2471. The website is <http://www.yogananda-srf.org>.

Self-Realization Fellowship neither endorses nor disapproves this book.

4. (p.50) “God created in nature an abundant variety of edible vegetables, fruits, grains, and other foods, everything necessary for man. Man cannot bring forth even a grain of wheat, much less a new plant or fruit. Only God can do this. He has to originate the species first. Man can only modify what already exists, as Luther Burbank did.”

From *The Divine Romance* by Paramahansa Yogananda. Published by Self-Realization Fellowship, Los Angeles, CA, 1986, p.180. Paramahansa Yogananda thought so highly of Luther Burbank, whom he described as “An American Saint”, that he dedicated his life story, the *Autobiography of a Yogi*, to his memory. The two were close friends and frequent visitors.

5. (p.52) The 24,000 year cycle to which this refers is the time it takes the Sun to circumnavigate through its orbit. During this cycle, the Earth goes from a state of Spiritual Enlightenment at the perigee, the point closest to the center of its orbit, to the Dark Ages, 12,000 years later, the complete darkness of knowledge and Spirit at the apogee, the point furthest from the center of its orbit. Currently, the Earth is in the ascending period of time, the Age of Rapid Development of Knowledge.

# About The Author

Greg Willis was born in Baltimore, Maryland in 1946 and raised in the Presbyterian and Quaker traditions of a family from the Midwest. After graduating from Baltimore Friends School in Baltimore, he received undergraduate degrees in Business from Catonsville Community College in 1968, Economics, Biology and Geography from the University of Maryland in 1970 and a Masters in Health Care Administration from George Washington University in 1974. Following an eight year career as a hospital administrator, he started his own Japanese woodworking and cabinetmaking company. When a back accident prevented him from continuing in the business, he began writing about his hobby, gardening.

After matriculating from graduate school, a deep interest in metaphysics and spiritual matters led him to investigate various religions and religious philosophies eventually guiding him to Self-Realization Fellowship. This organization, which was started in 1920 by the great Indian Master and yogi, Paramahansa Yogananda, provided training in Kriya Yoga meditation techniques which Greg, now a Kriyaban (or Kriya Yogi), has practiced since 1978.

He is a graduate of the Course in Intuitive Development offered by S.A.M., the Society for the Advancement of Mankind, and has continued his education in many medical, agricultural, scientific and metaphysical subjects since then. He is a prolific writer.

In 1986, Greg was awarded **Second Place in Rodale's Organic Gardening Magazine Gardener of the Year Contest**. That same year he wrote and published *The Companion Planting Guide For Vegetable Gardens*, the most complete and comprehensive guide to companion planting ever published in an easy-to-use chart. In 1993, wrote The 1994 *Astronomical Gardening Guide*, published by Celestial Products, Inc. For this effort, he was presented with a Merit Award in the World Calendar Contest in 1994.

His next book, *The Lost Secrets Of The Garden*, was published in 1995.

Since 1980, he has worked to remove and overcome the weaknesses of commercial agriculture and viticulture. His work is a continuation of the agricultural work of Rudolf Steiner, Luther Burbank and Dr. George Washington Carver. In doing so, he created a more advanced system of organic agriculture than has been done before. He has formulated 43 new homeopathically prepared, herbal - mineral agricultural remedies that will, when used with a system of compost, cover crops, companion planting, sound holistic management and no chemicals or poisons, cure any crop of any disease anywhere in the world.

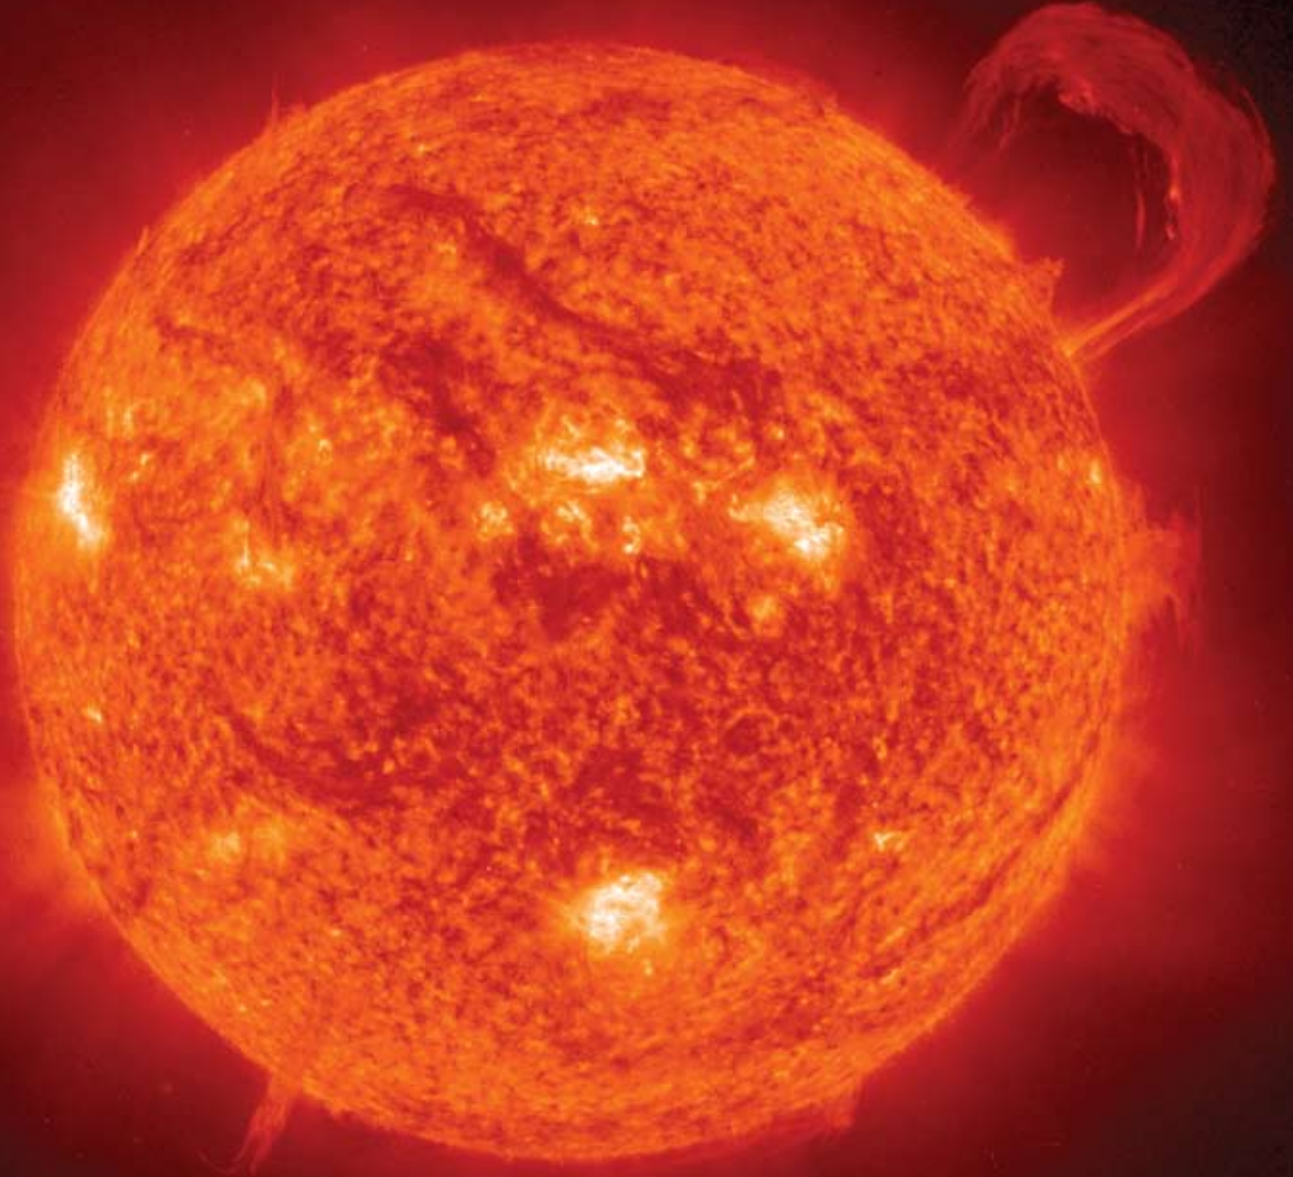

Using his system, yields double and triple, quality improves dramatically, eliminating noxious insects and insect damage, operating costs have been lowered by as much as 75% and profits have doubled and tripled.

He has also formulated a range of 15 homeopathically prepared herbal - mineral personal care products that some believe will revolutionize medicine.

Greg works as an agriculture and viticulture consultant, writer, inventor, lecturer, teacher and clairvoyant counselor helping people improve their lives through deep spirituality and to grow food without poisons or chemicals. He lives in the Dallas area of North Texas and is the proud father of two very intelligent and gifted sons.

Greg can be reached at 214-592-9800 or [herbalmiracles@yahoo.com](mailto:herbalmiracles@yahoo.com).

*The Sun • NASA/JPL Photo*

Take a guided tour through our Solar System and learn why our Sun, Moons, Planets, Solar System and Galaxy are here and what we can learn from them for our spiritual growth. Beyond Astrology. Beyond Astronomy. Beyond anything you have ever seen before. Easy to read. Easy to love. Learn why our Solar System was created to provide a place for you to learn the lessons that lead to Unconditional Love and your return to your Divine Creator. Beautifully illustrated with 43 full color satellite photos and illustrations from NASA/JPL and the Hubble Space Telescope.

Internationally known Author and Clairvoyant Greg Willis records intimate, revealing interviews with the Planet Souls who take care of God's celestial orbs and whose purpose in life is to give you what you need to reach perfection. "Unconditional Love means 'without condition'. It is the ability to act in perfect harmony with the Divine. It is the ability to love another without making constraints on the emotion or the relationship. It is also the recognition that every soul is a son and daughter of God and as such, deserves our respect and love."

This book is a "must have" for anyone who loves astronomy, astrology, Mother Earth or deep spiritual insights and lessons of life. Easily comparable to Jonathan Livingston Seagull and The Celestine Prophecy, this amazing book will be a Best Seller.
